

7th SESSION OF THE MEETING OF THE PARTIES

04-08 December 2018, Durban, South Africa

“Beyond 2020: Shaping flyway conservation for the future”

DRAFT AEWA STRATEGIC PLAN 2019-2027

Introduction

The 6th Session of the Meeting of the Parties to AEWA (MOP6, Bonn, November 2015) instructed the Standing Committee, working with the Technical Committee and Secretariat, to revise the existing Strategic Plan 2009-2018 and to present a draft covering the period 2019–2027 for consideration at MOP7 (2018).

The Standing Committee established a Strategic Plan Working Group (SPWG) with participation the full Standing Committee plus the EU and nine other Parties appointed on a ‘first-come, first-served’ basis. In addition, the Technical Committee was represented by nine members, the Chair & Vice-Chair, the three thematic experts, the invited CEPA expert, and the three NGO members. Finally, the Working Group also included observers & partners from the CMS Secretariat, the AEWA African Initiative Technical Support Unit, and four NGOs.

A facilitated meeting of the SPWG was held in Bonn, 28–30 June 2016. This discussed the findings of an evaluation of the existing Strategic Plan 2009-2018 and identified some of the key elements to be included in the new Strategic Plan, including provisional Objectives and content for many of the associated Targets and Actions. Alongside detailed notes taken during the meeting, these have been used by the compilers (in consultation with the UNEP/AEWA Secretariat) as the basis for a preliminary consultation draft circulated to members of the SPWG in September 2016.

The following revised draft, which took into account the comments from Working Group members, was discussed in detail between the consultants and the UNEP/AEWA Secretariat, following which a further amended draft was transmitted to all Contracting Parties (in both English and French) in March 2017. Based on feedback from Parties, this final draft was produced and agreed by the Working Group in July 2017, which has formally also been approved by the Standing Committee for submission to MOP7 at its 13th Meeting in July 2018.

Action required from the Meeting of the Parties

The Meeting of the Parties is invited to review the draft AEWA Strategic Plan for the period 2019-2027 and adopt it for further implementation.

DRAFT AEWA STRATEGIC PLAN 2019–2027

*Prepared by the Rubicon Foundation, in consultation with the UNEP/AEWA Secretariat,
on behalf of the Strategic Plan Working Group*

Final version: October 2018

Objective 4: To ensure there is sufficient quantity and quality of habitat in the wider environment for achieving and maintaining favourable conservation status for migratory waterbird populations.....	27
Objective 5: To ensure and strengthen the knowledge, capacity, recognition, awareness and resources required for the Agreement to achieve its conservation objectives.....	31
Annex I – Summary of Technical Committee outputs required under the Draft AEWA Strategic Plan 2019- 2027	36
Annex II – List of AEWA Partners covered by the ‘Main Actors’ column of the Strategic Plan.....	37

Scope

Building on AEWA's first Strategic Plan, which initially covered the period 2009–2017 but was later extended to 2018, the *AEWA Strategic Plan 2019–2027* provides the framework for implementation of the Agreement by the Contracting Parties, Standing Committee, Technical Committee, Secretariat and Partners. It covers three complete triennia (or intersessional periods) between sessions of the Meeting of the Parties (MOP), from MOP7 (in 2018, when the draft *Strategic Plan 2019–2027* will be tabled for discussion and final adoption by Contracting Parties), to MOP10 due to be held in 2027.

Process

MOP6 (Bonn, 2015) instructed the Standing Committee, working with the Technical Committee and Secretariat, to revise the existing Strategic Plan and to present a draft covering the period 2019–2027 for consideration at MOP7 (2018). The Standing Committee established a Strategic Plan Working Group (SPWG) with participation as follows:

Parties: Uganda (Chair of Standing Committee and Chair of SPWG), France (Vice-Chair of Standing Committee), Georgia, Ghana, Libya, Netherlands (all Standing Committee members), plus EU, plus nine other Parties (appointed on a 'first-come, first-served' basis) – Benin, Czech Republic, Germany, Kenya, Mauritius, South Africa, Swaziland, the United Kingdom and the United Republic of Tanzania.

Technical Committee: Chair & Vice-Chair, three thematic experts, invited CEPA expert, NGO members (CIC, IUCN, Wetlands International).

Observers & Partners: CMS, AEWA African Initiative Technical Support Unit, BirdLife International, FACE, OMPO, WWT.

A facilitated meeting of the SPWG was held in Bonn, 28–30 June 2016. This discussed the findings of an evaluation of the existing Strategic Plan 2009–2018 and identified some of the key elements to be included in the new Strategic Plan, including provisional Objectives and content for many of the associated Targets and Actions. Alongside detailed notes taken during the meeting, these have been used by the compilers (in consultation with the UNEP/AEWA Secretariat) as the basis for a preliminary consultation draft circulated to members of the SPWG in September 2016.

The following revised draft, which took into account the comments from Working Group members, was discussed in detail between the consultants and the UNEP/AEWA Secretariat, following which a further amended draft was transmitted to all Contracting Parties (in both English and French) in March 2017. Based on feedback from Parties, this final draft was produced and agreed by the Working Group in July 2017, which has formally also been approved by the Standing Committee for submission to MOP7 at its 13th meeting in July 2018.

Structure

A hierarchical logical framework structure has again been followed, adapting that used for the 2009–2017 Strategic Plan. The principal high-level elements are:

- **Mission** (of AEWA)
- **Goal** (of the Strategic Plan 2019–2027)
- **Purpose** (of the Strategic Plan, including six high-level indicators for assessing whether the Purpose has been met by 2027)

➤ Objectives

There are five **Objectives** – four substantive conservation objectives and one enabling objective:

Substantive conservation objectives

1. To strengthen species conservation and recovery and reduce causes of unnecessary mortality.
2. To ensure that any use and management of AEWA-listed migratory waterbird populations is sustainable across their flyways.
3. To establish and sustain a coherent and comprehensive flyway network of protected areas and other sites, managed to maintain – and where necessary restore – their national and international importance for migratory waterbird populations.
4. To ensure there is sufficient quantity and quality of habitat in the wider environment for achieving and maintaining favourable conservation status for migratory waterbird populations.

Enabling objective

5. To secure and strengthen the knowledge, capacity, recognition, awareness and resources required for the Agreement to achieve its conservation objectives.

For each **Objective** between four and six 2027 **Targets** have been identified, with every **Target** incorporating as far as possible a tangible threshold against which delivery can be assessed.

Each Target is accompanied by specific **Indicators** with **Means of Verification** and corresponding **Actions**. A few Indicators are tagged with the qualifier ‘interim’ in brackets. These are used for tracking the progress of interim elements of composite targets leading towards the delivery of the final anticipated result. The term **traffic light assessment** appears regularly in the ‘Indicator and means of verification’ column in relation to qualitative indicators. The traffic light system is simply used to attach a ‘green’, ‘amber’ or ‘red’ ranking to a given indicator, according to whether the progress made is assessed as good, moderate or poor. Simple assessment criteria or thresholds will be required for each traffic light indicator proposed.

The last two columns of the logical framework provide links to relevant resources produced by AEWA and/or its Partners and highlight, especially the contribution of the AEWA Strategic Plan to three major global frameworks for action, notably:

- [Sustainable Development Goals \(SGDs\)](#)
- [Aichi Biodiversity Targets](#)
- [Strategic Plan for Migratory Species \(SPMS\)](#)

A number of important linkages with the World Heritage Convention and the Ramsar Convention on Wetlands are also highlighted.

Overarching and Cross-cutting Issues

These are fundamentally important factors that do not fit under any single Objective exclusively, but rather apply to several or all five of them. They have been taken into account in the preparation of the Strategic Plan but more importantly need to be active elements of its implementation, monitoring and evaluation.

- **Climate Change** – The impacts of climate change, which are already having demonstrable effects on migratory waterbirds and their habitats across the Agreement Area, together with appropriate mitigation and adaptation measures, are integrated into the planning and implementation of all species and habitat conservation measures under the AEWA Strategic Plan, in line with Targets 13.1 and 13.2 of the Sustainable Development Goals and Targets 10 and 15 of the Aichi Biodiversity Targets.
- **Indigenous and local communities** – The traditional knowledge, innovations and practices of indigenous and local communities relevant for the conservation and sustainable use of migratory species, their habitats and migration systems, and their customary sustainable use of biological resources, are taken into account subject to national legislation and relevant international obligations, including in particular paragraph 2.1 of the AEWA Action Plan. See also Target 18 of the Aichi Biodiversity Targets, Target 14 of the Strategic Plan for Migratory Species and Target 10 of the Ramsar Strategic Plan.
- **Poverty alleviation and gender equality** – In line with the Sustainable Development Goals (Goal 1, Goal 5) and Aichi Biodiversity Targets (Target 14) and considering the relevance of community livelihood issues in the framework of the conservation of migratory waterbirds and their habitats, projects, programmes and activities developed and implemented in the framework of this Strategic Plan are reviewed and, where necessary and feasible, adapted to ensure that they contribute to furthering poverty alleviation and gender equality.
- **Communication, Education and Public Awareness (CEPA)** – Successful CEPA is recognised as a prerequisite for meeting each of the Objectives of the AEWA Strategic Plan by means of a dedicated AEWA CEPA Plan which identifies specific CEPA activities relevant to the implementation of the Strategic Plan Targets and Actions.
- **Capacity building** – Capacity for implementation varies widely across the Agreement Area. The Parties, the UNEP/AEWA Secretariat and project development/implementation Partners continue to attach high priority to strengthening institutional, technical and resource capacity, subject to available resources and in conjunction with the AEWA Plan of Action for Africa, where this is required for successful delivery of Strategic Plan Targets.
- **Science-based approach** – Implementation of AEWA, including the review of listing of waterbird populations in Table 1 of the AEWA Action Plan and the development of flyway-level Species Action and Management Plans for species/populations and habitats, is based on the best-available scientific information (e.g. International Waterfowl Census data), as advised by the Technical Committee and taking into account the input of technical and research Partners. The science-based approach of AEWA is reflected throughout this Strategic Plan.

Operational Principles

These identify specific aspects of AEWA’s internal functioning that will be equally critical to achievement of all five strategic Objectives:

- **Alignment of AEWA strategic documents and workplans** – The AEWA Strategic Plan 2019-2027, the Plan of Action for Africa 2019-2027 and the workplans of the Technical Committee and Secretariat, including the Agreement’s Communication Plan, are fully aligned.

Use of AEWA National Reports to support the implementation of the Strategic Plan and its monitoring – The National Report format is optimised so that it enables the analyses required for generating and tracking the indicators for Strategic Plan Targets, as well as implementation of other AEWA work plans and documents aligned to the Strategic Plan. All Parties complete and submit full and comprehensive National Reports to each session of the MOP.

Draft AEWA Strategic Plan 2019 - 2027: Logical Framework

AEWA's mission:	To undertake coordinated and concerted actions at flyway level for the conservation of migratory waterbirds and their habitats. ¹
Goal of the Strategic Plan 2019–2027:	To maintain migratory waterbird species and their populations in a favourable conservation status or to restore them to such a status throughout their flyways. ²
Purpose of the Strategic Plan 2019–2027:	By 2027 the status of AEWA populations ³ is improved.

Purpose-level indicators (These six indicators with their associated target thresholds are for use in monitoring the degree to which the overall Purpose of the Strategic Plan is being met. They are complemented by the target-level indicators listed under each Objective of the Strategic Plan.)	Explanatory information and current baseline
P1. At least 75% of AEWA populations with known trends show a stable or increasing trend.	Current baseline: 65% (n=432 populations)
P2. At least 55% of 'priority' populations (as established in 2018) show a stable or increasing trend.	'Priority' populations are those listed in Table 1 of the AEWA Action Plan and classified as Globally Threatened species (i.e. Critically Endangered, Endangered and Vulnerable) or Near Threatened species on the IUCN Red List of Threatened Species as reported in the most recent summary by BirdLife International, as well as those listed in Table 1, Column A, Categories 2 and 3 that are marked with an asterisk. Current baseline: 45% (n=80 populations)
P3. At least 60% of populations with unfavourable conservation status in 2018 show a stable or increasing trend.	Populations with unfavourable conservation status include those listed in Column A, Categories 1(c), 2 & 3 and Column B, Category 2, in Table 1 of the AEWA Action Plan. Current baseline: 51% (n=155 populations)
P4. Percentage of harvested AEWA populations with known trends that show a stable or increasing trend.	A harvested population is a population that is legally harvested in at least one country within its range.

¹ The Mission reflects Article II.1 of the Agreement text.

² The Goal reflects the penultimate paragraph of the preamble to the Agreement text.

³ 'AEWA populations' means those listed in Table 1 of the AEWA Action Plan, Annex 3 to the Agreement.

	<p>The target threshold for this indicator is to be defined on the basis of the most up-to-date information available after the baseline has been identified.</p> <p>Current baseline: to be identified once the list of harvested populations has been determined.</p>
<p>P5. At least 70% of AEWA populations highly dependent on site networks with known trends show a stable or increasing trend.</p>	<p>Populations highly dependent on site networks are those for which 25% or more of the population occurs at relatively few key sites during at least one season of its annual cycle.</p> <p>Current baseline: 63% (n=355 populations)</p>
<p>P6. At least 70% of dispersed AEWA populations with known trends show a stable or increasing trend.</p>	<p>A dispersed population is one where at least 75% of the population is ‘dispersed’ during at least one season of its annual cycle, with relatively small numbers occurring at multiple sites.</p> <p>Current baseline: 63% (n=320 populations)</p>

Objective 3: To establish and sustain a coherent and comprehensive flyway network of protected areas and other sites, managed to maintain – and where necessary restore – their national and international importance for migratory waterbird populations					
3.1 Known sites of national or international importance ⁴⁴ for populations listed in Table 1 of the AEWa Action Plan have been reviewed and confirmed (in conformity with Paragraph 3.1.2 of the Action Plan) and at least three-quarters of the priority site gaps ⁵¹ are filled in the case of Contracting Parties.	<p>Indicator (quantitative): Number/percentage of Parties that have reviewed and confirmed the known internationally and nationally important sites for migratory waterbirds in their territory.</p> <p>Indicator (quantitative): Number/percentage of Parties that have conducted gap-filling assessments at national level.</p> <p>Means of verification: National Reports to MOP8–MOP10; Site Network Review; Technical Committee outputs.</p>	a) By MOP8, Parties review and confirm an inventory of the known nationally and internationally important sites in their territory, taking into consideration existing site inventories and using a simple framework to be developed and disseminated by the Technical Committee in 2019. This framework should include provision of brief guidance to Parties on interpreting AEWa Action Plan references ⁵² to "sites of international or national importance" and "internationally accepted criteria of international importance". It should also take into account existing site network criteria, including those used to identify EU Special	Parties Technical Committee Partners	Critical Site Network Tool ⁵⁴ <i>Consolidated Report on the Subregional Gap Identification Workshops under the Wings Over Wetlands Project</i> WOW Technical Report 12, 2008 ⁵⁵ <i>Preliminary Report on the Site Network for Waterbirds in the Agreement Area</i> (MOP5, 2012) ⁵⁶	<p>SDGs:</p> <ul style="list-style-type: none"> • Targets 14.2, 15.1, 15.5 <p>Aichi Targets:</p> <ul style="list-style-type: none"> • Target 11 <p>Strategic Plan for Migratory Species:</p> <ul style="list-style-type: none"> • Target 10

⁵⁰ This column lists the actors with primary responsibility for implementing actions. It does not list actors that play a secondary supporting/facilitating role.

⁵¹ As identified in *Consolidated Report on the Subregional Gap Identification Workshops under the Wings Over Wetlands Project* WOW Technical Report 12, 2008.

⁵² Paragraphs 3.1.2 and 3.2.2 of the AEWa Action Plan state that Parties shall endeavour "as a matter of priority, to identify all sites of international or national importance for populations listed in Table 1" and "to give special protection to those wetlands which meet internationally accepted criteria of international importance". However, neither the Agreement text, nor that of the AEWa Action Plan, provides guidance on interpreting these provisions. This Action of the Strategic Plan therefore includes tasking the Technical Committee with providing such guidance to Parties.

national levels have been assessed as realistically as possible and corresponding resource mobilisation plans implemented. ⁸⁵	<p>Indicator (quantitative): Percentage of international-level resource requirement that has been successfully mobilised.</p> <p>Indicator (quantitative): number of Contracting Parties that have (i) assessed resource requirements at national level; and (ii) implemented resource mobilisation plans.</p> <p>Indicator (qualitative): traffic-light assessment (grouped regionally or sub-regionally) of progress made with resource mobilisation at national level.</p> <p>Means of verification: Standing Committee and Secretariat Reports to MOP8–MOP10; National Reports to MOP8–MOP10</p>	<p>the 2019–2027 AEWA Strategic Plan and develops a corresponding resource mobilisation plan for approval by the Standing Committee.</p> <p>b) Within one year of MOP7, Parties undertake a national-level assessment of resource requirements for the delivery of the 2019-2027 AEWA Strategic Plan and draw up appropriate national resource mobilisation plans.</p> <p>c) Review and update as necessary in time for consideration at MOP8–MOP10 (i) international and national resource requirements and (ii) progress in the implementation of corresponding resource mobilisation plans.</p>	Secretariat Partners		<p>Strategic Plan for Migratory Species:</p> <ul style="list-style-type: none"> • Target 16

⁸⁵ Recognising that implementation of AEWA contributes to implementation of Parties' commitments under other MEAs, including CBD, CMS and Ramsar.

Annex I – Summary of Technical Committee outputs required under the Draft AEWA Strategic Plan 2019-2027

SP Objective	Related Technical Committee outputs* (*also includes outputs prepared by others but requiring review by the TC) ‘UPDATE’ indicates an updated version of an existing output. ‘NEW’ indicates a completely new TC output required under the Objectives of the Draft Strategic Plan.
Objective 1.2:	<ul style="list-style-type: none"> • UPDATE: Priority lists of populations for action planning • UPDATE: Status of preparation and implementation of AEWA International Single Species Action and Management Plans as well as Multi-Species Action Plans
Objective 1.3	<ul style="list-style-type: none"> • NEW: List of populations for which new or improved conservation and management guidance is required
Objective 1.5	<ul style="list-style-type: none"> • UPDATE: Conservation Status Report
Objective 1.6	<ul style="list-style-type: none"> • NEW: Report on multilateral processes that can contribute most to progressing AEWA species conservation priorities
Objective 2.1	<ul style="list-style-type: none"> • NEW: Priority lists of populations for collecting harvest data
Objective 2.2	<ul style="list-style-type: none"> • UPDATE: Guidelines on national legislation for the protection of species of migratory waterbirds and their habitats • UPDATE: Report on pertinent hunting and trade legislation in each country relating to the species listed in Annex 2 to AEWA
Objective 3.1	<ul style="list-style-type: none"> • NEW: Framework for the inventory of internationally and nationally important sites, including interpretation of the terms sites of international or national importance and internationally accepted criteria of international importance (2019) • NEW: Inventory of nationally and internationally important sites in the Agreement Area (following MOP8) • UPDATE: Site network review (MOP10)
Objective 3.2	<ul style="list-style-type: none"> • NEW: Monitoring framework for the AEWA flyway site network (MOP8) • UPDATE: Site network review (MOP10)
Objective 4.2	<ul style="list-style-type: none"> • NEW: Table indicating the key international policy mechanism(s) to be targeted and the habitat conservation priorities to be promoted with each mechanism • NEW: Advice and guidance to selected international policy mechanisms on maximising incentives and habitat measures for waterbirds, which provide positive impacts and avoiding negative impacts from perverse incentives/subsidies
Objective 5.1	<ul style="list-style-type: none"> • NEW: Report on key gaps in information availability on relevant aspects of the Agreement
Objective 5.4	<ul style="list-style-type: none"> • NEW: Summary report on AEWA’s contribution to the relevant global frameworks

Annex II – List of AEWPA Partners covered by the ‘Main Actors’ column of the Strategic Plan

“Partners” includes, but is not necessarily restricted to, the following:

- Other United Nations bodies and Multilateral Environmental Agreements (MEAs).
- Secretariats and technical/scientific bodies of other MEAs and their projects/programmes/initiatives, notably those within the CMS Family, but also the Convention on Wetlands (Ramsar Convention – including relevant Ramsar Regional Initiatives), Convention on the Conservation of Biological Diversity (CBD), Convention on International Trade in Endangered Species of Wild Fauna & Flora (CITES), Convention on the Conservation of European Wildlife & Natural Habitats (Bern Convention), Trilateral Cooperation on the Protection of the Wadden Sea, and the Revised African Convention on the Conservation of Nature and Natural Resources. MEAs with specific relevance to the seabird species covered by AEWPA include: Baltic Marine Environment Protection Commission (HELCOM), Conservation of Arctic Flora & Fauna (CAFF), Convention for the Protection of the Marine Environment of the North-East Atlantic (OSPAR Convention), Convention for Protection of the Mediterranean Sea against Pollution (*Barcelona Convention*), the Convention on the Protection of the Black Sea Against Pollution (Bucharest Convention), Convention for Cooperation in the Protection, Management and Development of the Marine and Coastal Environment of the Atlantic Coast of the West, Central and Southern Africa Region (Abidjan Convention), Convention for the Protection, Management and Development of Marine and Coastal and Environment of the Western Indian Ocean Region (Nairobi Convention), and Regional Fisheries Management Organisations (RFMOs).
- Other frameworks, including the International Union for the Conservation of Nature (IUCN – notably the Specialist Groups of the IUCN Species Survival Commission) and the East Asian-Australasian Flyway Partnership (EAAFP).
- Secretariats and relevant bodies of Regional Economic Integration Organizations.
- International nature conservation NGOs, notably BirdLife International, International Crane Foundation / Endangered Wildlife Trust, Wetlands International, the Wildfowl & Wetlands Trust, and the World Wildlife Fund (WWF).
- International hunting organisations, notably the European Federation of Associations for Hunting & Conservation (FACE), International Council for Game & Wildlife Conservation (CIC), and Migratory Birds of the Western Palearctic (OMPO).
- Other relevant international and national NGOs, including from other sectors.
- Universities and technical/research institutes, including the University of Aarhus and the US Geological Survey.
