

## 8<sup>th</sup> SESSION OF THE MEETING OF THE PARTIES

5 – 9 October 2021, Budapest, Hungary

---

### DRAFT BUDGET PROPOSAL FOR 2022 - 2024

#### Introduction

In accordance with Article VI, paragraph 8c of the Agreement, the budget and any other matters relating to financial arrangements for the Agreement shall be adopted at each ordinary session of the Meeting of the Parties.

At MOP7 in December 2018, the Parties adopted the triennial budget and the Scale of contributions for 2019-2021 through Resolution 7.12 on the basis of the criteria and approach recommended by the Standing Committee:

- a) The minimum contribution was retained at 2,000 EUR;
- b) The EU contribution was fixed at the original 2.5 %;
- c) The maximum threshold was retained at 20 %;
- d) All contributions that would decrease compared to MOP6 were frozen at their current amount. This led to a "saving".
- e) The "saving" was used to decrease those Parties' contributions that would otherwise contribute more than 10 % to the total budget; contributions that fell below the amount adopted at MOP6 through this exercise were again frozen and the "saving" was used to further decrease the most affected contributions (i.e. with the highest increase);
- f) The return to the UN scale of assessments was planned to be implemented through a gradual transitional period consisting of two MOP cycles (six years), through which the Parties experiencing an increase would see their contributions increase gradually year per year, respectively an increase of 30, 33 and 37 %;
- g) Contributions from new Parties were to be directed into the AEWA Trust Fund, as done in the past.

Through Resolution 7.12 the Contracting Parties, further, requested "the Secretariat, using the financial and staff rules and regulations of the United Nations including UNEP financial rules, and other administrative issuances promulgated by the Secretary-General of the United Nations, to develop a series of budget scenarios for further consideration by Parties at the 8<sup>th</sup> Session of the Meeting of Parties".

Moreover, the Parties recognized "that all P posts recommended for upgrade in the reclassification assessment undertaken in 2016 will need to be reconsidered for upgrade at the 8<sup>th</sup> Session of the Meeting of the Parties in order to meet United Nations rules and regulations".

At its 16<sup>th</sup> Meeting on 4-6 May 2021 the Standing Committee advised not to continue returning to the UN scale of assessments through a second (and last) transitional period in 2022-2024, but – considering the difficult financial situation faced by many countries due to the COVID-19 pandemic - to maintain the method used at MOP7 for another triennium and postpone the move towards the UN scale of assessments in order to avoid considerable increases for certain Parties caused by the return to the UN scale of assessments.

The recommendations of the Standing Committee in connection with the scale of contributions were as follows:

- To use the current UN scale of assessments 2019-2021;
- To keep the minimum contribution at 2,000 EUR;
- To retain the maximum threshold at 20 %;
- To freeze all contributions that would otherwise decrease.

On the basis of Resolution 7.12 and the recommendations of the Standing Committee in connection with the scale of contributions, the Secretariat has prepared six budget scenarios and tables reflecting the contributions of Parties under each scenario.

### **Actions Requested from the Meeting of the Parties**

The Meeting of the Parties is requested to review the elaborated scenarios and contributions tables and to adopt a budget for 2022-2024 and draft Resolution AEW/MOP8 DR12 on Financial and Administrative Matters.

#### **A. Budget scenarios for 2021-2024**

For the different scenarios described below, the budget has been divided into the following categories (similar to the previous budget for the period of 2019-2021 adopted through Resolution 7.12):

- General Management
- Implementation of the African Initiative
- Servicing the Meeting of Parties
- Servicing the Technical Committee
- Servicing the Standing Committee
- Programme Support Costs (13% UNEP overhead costs)

#### **Scenario 1: Zero nominal growth – 0 % increase**

Under Scenario 1, no increase of the total budget is foreseen compared to the overall budget approved for the triennium 2019-2021. The CMS standard salary costs as adopted at MOP7 have been applied, including the 2% annual increment to account for the impact of inflation on statutory staff costs (these standard salary costs are maintained throughout all scenarios). As a consequence, the operational costs have to be reduced to keep the grand total budget at a nominal growth level.

In terms of Secretariat staff, this option provides for maintaining all nine posts (full time or part-time, representing 7.3 full time equivalent), funded by the core budget. However, none of the additional posts and post occupancies currently depending on voluntary contributions has been integrated in the core budget, which creates a high risk of losing these additional positions and post occupancies. The zero-nominal growth budget

in fact implies a real reduction in terms of the operation and functioning of the Secretariat. Four staff members<sup>1</sup> have worked above the percentages covered by the core budget for their position over the period of 2019-2021 and before, in order to maintain the basic functioning of the Secretariat based on the requirements of the Treaty and MOP mandates. One additional post<sup>2</sup> (plus the two positions under the European Goose Management Platform) is fully funded through voluntary contributions. As such, this scenario will actually lead to a significant decrease in terms of manpower due to the uncertainty of possible funds for staff time during the period of 2022-2024.

It was a common practice at the previous MOPs to adopt a core budget which did not cover all the mandatory tasks such as e.g. the production of the international reviews that the Secretariat is requested to prepare for each MOP, in coordination with the Technical Committee and all Parties, through paragraph 7.4 and 7.5 of the AEWA Action Plan. The MOPs requested the Secretariat to raise voluntary contributions to fill the funding gaps. As a result, staff members spend a lot of time on fundraising to cover the costs for mandatory activities. This system has its limits though as voluntary contributions are more and more difficult to obtain and it leads to time-consuming activities (fundraising efforts and follow up, administration in a separate trust fund, final reports to donors etc.).

If this budget scenario 1 is adopted, there will be the risk that mandatory tasks cannot be carried out due to a lack of voluntary funding. In particular, it could happen that the AEWA Secretariat would e.g. not be in a position to coordinate all ISSAPs, follow-up the Implementation Review Process or provide all mandatory reviews to MOP9. For the African Unit, there is a risk to see the two staff members leave the Secretariat, should voluntary contributions not be available to cover the gap of 50 % of the P2 position and 30 % of the G5 position.

Furthermore, the travel budget has been decreased under this scenario compared to the one allocated in the 2019-2021 budget. In order to further decrease the already very limited budgets for the organisation of the Standing Committee meetings the StC members, moreover, suggest holding both meetings in virtual format. This suggestion is maintained throughout all budget scenarios. Finally, other operative costs are further reduced to a minimum in this scenario but will allow the Secretariat to maintain very basic services only. No budget can be allocated to the implementation of the African Initiative (Small Grant Fund and Plan of Action for Africa).

Finally, it should be noted that the costs linked to the implementation of the ERP UMOJA are, so far, covered by the 13 % UNEP overhead that is charged to the overall budget in order to finance the administration of UNEP/AEWA Secretariat through UNEP with support from UNON. However, it might be requested in future to charge these costs separately from the 13 %. In this case the Secretariat would have to face an additional yearly expenditure of 22,000 – 24,000 USD. The Secretariat hopes that these costs will continue to be charged in the frame of the 13 %; in the other case the AEWA budget will need to be revised accordingly or the needed amount will have to be withdrawn from the Trust Fund with the permission of the Parties or the Standing Committee on their behalf, provided the savings are sufficient.

## Scenario 2: Zero real growth – + 4.04% / Scenario 1

Zero nominal growth
+ 2 %/ year as per estimated inflation rate

<sup>1</sup> Coordinator of the African Initiative and Assistant, SICU Assistant and Information Assistant.

<sup>2</sup> Coordinator of Single Species Action Plans

This scenario aims at covering the loss of purchasing power due to inflation. Estimated at 2% per year, this leads to an increase of 4.04 % in total compared to Scenario 1. It can be regarded as the zero real growth scenario. Scenario 2 includes all elements (and risks) included in Scenario 1. In addition, the present option provides a better budget for the official travels and for servicing the Meeting of the Parties and a slightly higher budget for all other operative budget lines to cover the inflation costs.

### Scenario 3: Securing the African Initiative + 8,28 % / Scenario 2

Zero real growth
+ 50 % Coordinator of the African Initiative (P-2)
+ 30% Programme Management Assistant to the African Initiative (G-5)

Scenario 3 foresees an increase of 8,28 % compared to Scenario 2. It includes all elements of Scenario 2. In addition, it suggests securing the African Unit by increasing the posts of the Coordinator of the African Initiative from 50 % to 100 % and the Programme Management Assistant (African Initiative) from 50% to 80%. Both posts have been occupied on 100 % and 80 % basis since their creation in 2008, thanks to voluntary contributions. The positions are linked to Article VIII d. of the Agreement, Resolution 4.9 and paragraph 2.2.1 and 7.3 of the AEWa Action Plan.

The rationale behind this scenario is to strengthen the African Initiative through reliably available programmatic and administrative support. This scenario will provide the Secretariat and the African Coordinator with planning security in terms of general support and particularly allow the African Coordinator to focus on the core programmatic work, instead of spending time on drafting proposals to try to fund the positions. Compared to Scenario 2 this scenario would significantly reduce the funding gap for the African Unit. Fundraising efforts within the African Unit could focus on implementation activities under the Plan of Action for Africa and the overall delivery of this unit would have potential to increase.

### Scenario 3bis: Consolidating the AEWa team

With additional funding made available through the core budget Parties could decide to go further and e.g. integrate all current Secretariat posts and therewith consolidate the current staff situation and performance of the Secretariat (example 3.1).

Alternatively, it could be decided to focus on the establishment of a compliance programme and, in addition, gradually or partially improve the situation of the existing posts that depend on voluntary contributions (example 3.2). This reduce the overall budget compared to scenario 3.1.

#### Example 3.1: Full consolidation of the current Secretariat team

Zero real growth
+ 50 % Coordinator of the African Initiative (full upgrade to P-3)
+ 30% Programme Management Assistant to the African Initiative (G-5)
+ 100 % Coordinator of Single Species Action Plans (P-3)
+ 50 % Information Assistant (G-5)
+ 20 % Programme Management Assistant SICU (G-5)
+ upgrade of the Executive Secretary (P-5)
+ upgrade of the Head of SICU (P-4)
+ upgrade of the Executive Management Support Officer (P-3)

+ upgrade of the Information Officer (P-3)
--

In order to maintain its current capacity, the Secretariat would need to be able to keep the positions of Programme Management Assistant (SICU) and Information Assistant at the current level of post occupancy of 100 % respectively, and to fund through the core budget the post of Coordinator of Single Species Action Plans, which has been in place for the past 14 years thanks to voluntary contributions received from the Government of Norway towards the coordination of the Lesser White-fronted Goose action plan and other species action plans. The coordination of implementation of species action plans is a task mandated under paragraph 2.2.1 of the AEWA Annex 3 (Action Plan).

These positions all deliver on key aspects of the Secretariat’s work programme, directly related to the mandate given to the Secretariat by the Agreement and the MOP. A discontinuity of voluntary contributions to support these positions, would, however, jeopardise the continuity of this essential support as it becomes increasingly difficult to successfully fundraise for staff positions. This affects the Secretariat’s (and staff members’) operation and planning security.

Finally, the Contracting Parties recognized through Resolution 7.12, para 21 “*that all P posts recommended for upgrade in the reclassification assessment undertaken in 2016 will need to be reconsidered for upgrade at the 8<sup>th</sup> Session of the Meeting of the Parties in order to meet United Nations rules and regulations*”.

These upgrades are suggested to be included in this scenario which provides for the full consolidation of the Secretariat team. A scenario which integrates all current posts at their actual grade and level of post occupancy would put the Secretariat in the position to at least cover the main mandates given to the Secretariat by the Agreement and the MOP Resolutions and to maintain the current level of performance of the Secretariat.

**Example 3.2: Gradual/ partial consolidation of the current Secretariat team and introduction of a new post of Compliance Officer**

Zero real growth
+ 30 % Coordinator of the African Initiative (P-2) in 2022 and 2023 and 50 % in 2024
+ 30% Programme Management Assistant to the African Initiative (G-5)
+ 50 % Compliance Officer (P-3) in 2024
+ 50 % Coordinator of Single Species Action Plans (P-3) in 2023 and 2024
+ 50 % Information Assistant (G-5)

The analysis of national reports to MOP7 in 2018 and the final assessment of the implementation of the Strategic Plan 2009-2018, have provided evidence of very low levels of compliance by Parties with the provisions of the Agreement (e.g. only 12 % of the Parties reported full protection of all Column-A-listed populations). In order to facilitate processes that would lead to improvement in compliance and to support Contracting Parties in achieving that, there is a need of establishing a targeted Compliance Programme and create capacity at the Secretariat for implementing it. As a first step, it is suggested to establish a P3 Compliance Officer position (compare Art. II, III and VIII (c) of the Agreement). Such a position cannot depend on funding from individual countries as this might create a conflict e.g. between donor Parties and Parties involved in a case under the AEWA Implementation Review Process (IRP).

**Scenario 4: Full consolidation of the current Secretariat team and establishment of a Compliance Programme + 47,32 % / Scenario 3**

Zero real growth
+ 50 % Coordinator of the African Initiative (P-2 in 2022; upgrade as of 2023)

+ 30% Programme Management Assistant to the African Initiative (G-5)
+ 100 % Coordinator of Single Species Action Plans (P-3)
+ 50 % Information Assistant (G-5)
+ 20 % Programme Management Assistant SICU (G-5)
+ 100 % Compliance Officer (P-3)
+ 100 % Technical Committee Support Officer (P-2)
+ upgrade of the Executive Secretary (P-5)
+ upgrade of the Head of SICU (P-4)
+ upgrade of the Executive Management Support Officer (P-3)
+ upgrade of the Information Officer (P-3)

Scenario 4 foresees an increase of 47,32 % compared to Scenario 3. The rationale behind this scenario is to reflect the actual full need of the Secretariat in terms of staff capacity in order to be able to follow up on all mandatory tasks under the Agreement and MOP Resolutions. In this respect it is suggested to integrate all current Secretariat posts in the core budget to maintain its current capacity at the actual level of staff members' post occupancies, which also implies the upgrade of five posts in order to meet the UN rules and regulations. In addition, this scenario foresees the establishment of a Compliance Programme with integration of a full-time post within the Secretariat to deliver on such programme and improve the overall implementation rate throughout the Agreement area. Finally, it suggests the establishment of a post of Technical Committee Support Officer to support the Science, Implementation and Compliance Unit, which is facing a constantly increasing amount of work.

**Conclusion:**

The Secretariat is well aware that the scenarios 3bis and 4 will tremendously increase the contributions of many Parties. However, their details should be considered carefully as these are the only scenarios which enable the Secretariat to comply with the UN regulations (upgrade of P-positions) and secure the mandatory tasks resulting from the Agreement and its Action plan (securing the African Unit, coordinating all ISSAPs and/ or to establishing a Compliance Programme).

It should be noted that linking positions to different and/or changing sources of funding creates a high risk for the Secretariat not to be able to fulfil some activities due to lacking funds. Catering for these positions in the core-budget as proposed will also free up valuable fundraising efforts for activities addressing the implementation of the Agreement directly.

Table 1: The below table shows which items have been added to each scenario.

Budget items	Mandates to which the post respond	Programmatic value	Scenario 1: zero nominal growth - no increase	Scenario 2: zero real growth - + 4,04 %	Scenario 3: Strengthen the African Initiative - + 8,28 %	Scenario 3.1: Consolidation of Secretariat's current staff situation – securing the status quo – + 24,92 % /scenario 3	Scenario 3.2: Gradual/ partial consolidation of current staff situation + compliance officer in year 3 - + 8,94 % /scenario3	Scenario 4: Consolidation of current staff situation + full establishment of Compliance officer + 47,32 % /scenario 3

				<b>1.051.671</b>			

Further details for each scenario are provided in **Annex 1**.

## B. Scale of contributions for 2021-2024

At MOP7 the budget for 2019-2021 was adopted with a scale of contributions which returns to the UN scale of assessments, as primarily foreseen by the Agreement, but with a gradual transitional period planned to consist of two MOP cycles (six years). At the same time, the maximum threshold of 20 % was maintained as well as the application of a minimum contribution of EUR 2,000, and contributions that would decrease were frozen to the advantage of increasing contributions, allowing a smoother transition. Thus, the adopted scale represented a modified version of the UN scale of assessment with integration of the above-mentioned criteria.

The strict application of the UN scale of assessment for the budget 2022-2024 would create considerable increases in case of a number of Parties, even if the budget was maintained at a zero nominal growth level. This could eventually lead to the adoption of a budget lower than the one adopted at MOP7, if no agreement was reached at MOP8. Other countries, however, would benefit from the application of the UN scale of assessments, although they might be willing to, at least, maintain the current level of financial commitment as stated during the financial working group discussions at MOP7.

Taking into consideration the overall current financial constraints faced by all governments in context of the COVID-19 pandemic the Standing Committee decided to maintain the criteria applied at MOP7 and to postpone the second step towards the full application of the UN scale of assessments and to reassess the budget situation and possibility of a full move towards the UN scale prior to MOP9 (StC16 decision). The Secretariat would like to point out that it will be crucial for the further functioning of the Agreement to choose a scale for 2022-2024 which will have no negative impact on the total budget to be shared by Parties.

**Annex 1** provides for each budget scenario a table showing the contributions calculated on basis of the criteria already applied at MOP7.

With respect to **Scenario 1** it should be noted that this method creates a saving of 18,000 EUR which will flow into the AEWA Trust Fund Reserve, as otherwise some Parties contributions would decrease below the amounts adopted at MOP7. Under this scenario all contributions will be maintained with the same amounts as adopted at MOP7, except for Algeria and Nigeria, which both benefited from a threshold of 50 % applied at exceptional basis and offset by a withdrawal of 6,000 EUR from the Trust Fund Reserve at MOP7.<sup>3</sup> In addition to the above-mentioned 18,000 EUR saved by freezing all contributions that would otherwise increase, this scenario creates another saving of 24,000 EUR, resulting from the contributions from the four new Parties that have acceded to the Agreement since MOP7 (Armenia, Malawi, Serbia, Turkmenistan).

Under **Scenario 1** no Party will have higher contributions than at MOP7 except Algeria and Nigeria (see explanation below). There will also be no decreasing contributions. The Trust Fund Reserve will be filled with an amount of 42,000 EUR in total.

Under **Scenario 2** 15 Parties (plus the EU) will have increasing contributions to the benefit of the AEWA budget. There will be no saving, but also no withdrawal from the Trust Fund Reserve.

Under **Scenario 3** 22 Parties (plus the EU) will have increasing contributions to the benefit of the AEWA budget with special focus on the African Initiative. There will be no saving, but also no withdrawal.

Under **Scenario 3.1** 32 Parties (plus the EU) will have increasing contributions to the benefit of the AEWA budget with special focus on the African Initiative. There will be no saving, but also no withdrawal.

---

<sup>3</sup> Parties decided through Resolution 7.12 “to set a threshold of 100% increase for all Parties’ contributions during the transitional period towards the UN scale of contributions, except for Algeria and Nigeria, Parties with oil-based economy, for which a threshold of 50% is applied with respect to the budget 2019-2021 at exceptional basis and to be offset by a withdrawal from the AEWA Trust Fund (AWL) of EUR 6,000”.

The **Scenario 4** applied creates an increase for 32 Parties (plus the EU) to the benefit of the AEWA budget, taking into account the full mosaic of requirements and mandates under AEWA. There will be no saving and no withdrawal from the reserve.

Summary Scenario 2 – 4: The Scenarios 2 – 4 create increases for some Parties to the benefit of the AEWA core budget. No Party will have lower contributions than at MOP7. A withdrawal from the Trust Fund Reserve is not foreseen under any scenario. However, a threshold for increases of e.g. 60 % or 100 % could be considered in order to distribute the increases more evenly between Parties under Scenarios 2 – 4.

## Annex 1: Budget scenarios 2022-2024

### Scenario 1: Zero nominal growth (0 % increase)

CORE BUDGET FOR THE TRIENNIUM 2022-2024 (IN EURO)						
BL	Budget Item	Category	2022	2023	2024	TOTAL
			EUR	EUR	EUR	EUR
