

Report on the implementation of AEWA for the period 2018-2020

The format for reports on the implementation of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) for the period 2018-2020 was approved by the 7th Session of the Meeting of the Parties (MOP7, 4-8 December 2018, Durban, South Africa) through Resolution 7.1 and modified by the Standing Committee at its 15th meeting (11-13 December 2019, Bristol, UK) as mandated by the MOP. This format has been compiled following the AEWA Annex 3 (Action Plan), the AEWA Strategic Plan 2019-2027 and resolutions of the MOP.

In accordance with article V(c) of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds, each Party shall prepare to each ordinary session of the MOP a National Report on its implementation of the Agreement and submit that report to the Agreement Secretariat. By Resolution 7.1 of the MOP the deadline for submission of National Reports to the 8th Session of the MOP was set at 180 days before the opening date of MOP8, which was scheduled to take place on 5-9 October 2021 in Hungary; therefore the deadline for submission of National Reports was Thursday 8 April 2021.

As per Resolution 7.1 of the MOP, Chapter 3 of the National Report Format for MOP8 reports was developed as a stand-alone online reporting module, which was administered through a separate reporting process on the population status of AEWA-listed (native) and non-native species of waterbirds for the period 2013-2018. This reporting process was concluded on 30 June 2020 as agreed by MOP7. Therefore, this report does not contain Chapter 3.

The AEWA National Reports 2018-2020 were compiled and submitted through the AEWA Online National Reporting System, which is part of the broader CMS Family Online Reporting System. The CMS Family Online Reporting System was developed by the UNEP-World Conservation Monitoring Centre (UNEP-WCMC) in close collaboration with and under the guidance of the UNEP/AEWA Secretariat.

1. General Information

Name of reporting Contracting Party

>>> Ethiopia

Date of entry into force of AEWA in the Contracting Party

>>> 01/02/2010

List any reservations that the Contracting Party has made (if any) in respect of any population(s) listed in Table 1 of Annex 3 or any specific provision of the AEWA Action Plan - either upon deposition of its instruments of accession (per AEWA, Article XV) or subsequent to any amendment of Table 1 or the AEWA Action Plan, as adopted by a session of the Agreement's Meeting of the Parties (per AEWA, Article X.6).

EU member states should list also all reservations entered by the European Commission on behalf of the European Union.

>>> None

2. Institutional Information

Please update information on the National AEWA Administrative Authority, the National Focal Points, the Designated National Respondent and the other contributors to this report.

Designated National AEWA Administrative Authority

Full name of the institution

>>> Ethiopian Wildlife Conservation Authority

Name and title of the head of institution

>>> Mr. Kumera Wakjira, Director General

Designated National Respondent (DNR) in charge of the compilation and submission of the AEWA National Report 2018-2020

Please select from the list below as appropriate.

The National Focal Point for AEWA Technical Committee (TC NFP) matters has been designated as the National Respondent

Other contributors to the AEWA National Report 2018-2020

Please list the names and affiliations (institution, organisation) of the other contributors to this report. For Contracting Parties in which nature conservation is not an exclusive competence of national/federal government, Designated National Respondents are encouraged to seek input from other relevant levels of government.

>>> Ethiopian Wildlife and Natural History Society which is a local conservation NGO and also a Bird life Partner in Ethiopia.

Pressures and Responses

4. Species Conservation

4.1 Legal Measures

1. Following MOP7, was a review undertaken in your country of the relevant domestic legislation against the provisions of the latest version of the Agreement text and its annexes, including Table 1 in Annex III, taking into account all amendments adopted by MOP7? (AEWA Strategic Plan 2019-2027, Actions 1.1 (a), 1.1 (b), 2.2(a) and 2.2(b))

Yes

Please indicate the outcome of this review

Relevant national legislation was not fully in line with the Agreement text and its annexes

Please describe the discrepancies that were identified.

>>> It did not take into consideration all the requirements of the AEWA Waterbird Species. The legislation did not revise for inclusion to prohibit some of the duck and snipe species with small population which are now allowed to hunt and trade although there is hunting quota restrictions.

Please indicate whether the relevant domestic legislation was subsequently adjusted to be in line with the Agreement text and its annexes

Relevant national legislation was not adjusted. Please explain the reasons.

>>> The Conservation institution in this case Ethiopian Wildlife Conservation Authority which has the mandate to develop and submit draft legislation and present to the higher legislative body in this case the Parliament for adoption and implementation.

Field for additional information (optional)

>>> Except the duck and Snipe species and terrestrial gamebirds the country has issued good legislation to conserve the wildlife resources in the country including waterbirds but there is little effort to enforce the laws which is the gap that needs to be taken into consideration.

2. Was your country's national legislation reviewed following the Guidance on Measures in National Legislation for Different Populations of the Same Species, Particularly with Respect to Hunting and Trade (Resolution 6.7)?

See Appendix 1 / Appendix 2 / Appendix 3

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

Please explain the reasons

>>> Hunting and trade of waterbirds is not applicable to all water birds in the country. Many waterbird species are prohibited by law for hunting and trade with regulation 163/2008. The personal, social, economic and cultural motives for hunting is also low. Hunting is mostly allowed for game birds that include ducks and snipes and terrestrial gamebirds, but the hunting and trade business do not usually exist.

3. Please confirm the protection status under your country's national legislation of the AEWA Table 1, Column A populations that are regularly occurring in your country (AEWA Action Plan, paragraph 2.1.1; AEWA Strategic Plan 2019-2027, Target 1.1).

Guidance on responding to this question:

1- Please click here and download the Excel file starting with your country's name. (**Notice:** before clicking on this hyperlink, please keep pressing the Ctrl button on your keyboard to open the link in a new tab.)

2- Fill in the Excel template comprehensively;

3- Upload the completed Excel file as an attachment here. For uploading please click on the little blue icon below containing a paper clip.

I confirm that I have downloaded the Excel file with my country's name, filled it in as necessary and uploaded the completed file as an attachment to this question.

You have attached the following documents to this answer.

[Ethiopia_Q3_AEWA_NR_2018-2020_PopCoIA.xlsx](#)

4. Please confirm whether there is an open hunting season for the AEWA Table 1, Column A,

category 2 or 3 with an asterisk or category 4 populations that are regularly occurring in your country (AEWA Action Plan, paragraph 2.1.1; AEWA Strategic Plan 2019-2027, Target 1.1).

Guidance on responding to this question:

1- Please click here and download the Excel file starting with your country's name. (**Notice:** before clicking on this hyperlink, please keep pressing the Ctrl button on your keyboard to open the link in a new tab.)

2- Fill in the Excel template comprehensively;

3- Upload the completed Excel file as an attachment here. For uploading please click on the little blue icon below containing a paper clip.

I confirm that I have downloaded the Excel file with my country's name, filled it in as necessary and uploaded the completed file as an attachment to this question.

You have attached the following documents to this answer.

[Ethiopia_Q4_AEWA_NR_2018-2020_PopCoIA-Cat2_3_4.xlsx](#)

5. Please confirm whether taking is regulated for the AEWA Table 1, Column B populations that are regularly occurring in your country (AEWA Action Plan, paragraph 2.1.2; AEWA Strategic Plan 2019-2027, Target 1.1).

Guidance on responding to this question:

1- Please click here and download the Excel file starting with your country's name. (**Notice:** before clicking on this hyperlink, please keep pressing the Ctrl button on your keyboard to open the link in a new tab.)

2- Fill in the Excel template comprehensively;

3- Upload the completed Excel file as an attachment here. For uploading please click on the little blue icon below containing a paper clip.

I confirm that I have downloaded the Excel file with my country's name, filled it in as necessary and uploaded the completed file as an attachment to this question.

You have attached the following documents to this answer.

[Ethiopia_Q5_AEWA_NR_2018-2020_PopCoIB.xlsx](#)

6. Please indicate if any of the following modes of taking are prohibited in your country: snares, limes, hooks, live birds which are blind or mutilated used as decoys, tape recorders and other electronic devices, electrocuting devices, artificial light sources, mirrors and other dazzling devices, devices for illuminating targets, sighting devices for night shooting comprising an electronic image magnifier or image converter, explosives, nets, traps, poison, poisoned or anesthetic baits, semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition, hunting from aircraft, motor vehicles, or boats driven at a speed exceeding 5 km p/h (18 km p/h on the open sea), other non-selective modes of taking. (AEWA Action Plan, paragraph 2.1.2(b); AEWA Strategic Plan 2019-2027, Target 1.1)

Yes, one or more modes of taking have been prohibited

Please provide details to each mode of taking in the list below:

Snares

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> Council of Ministers Regulation No 163/2008 adopted to provide for Wildlife development, conservation and utilization prohibits the use of snare made of wire, automatically shot gun , pitfall trench, net, enclosure, snare, poison or any such injurious methods or any self-loadibg weapon.

Limes

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> Council of Ministers Regulation No 163/2008 adopted to provide for Wildlife development, conservation and utilization prohibits the use of snare made of wire, automatically shot gun , pitfall trench, net, enclosure, snare, poison or any such injurious methods or any self-loadibg weapon

You have attached the following documents to this answer.

[eth136632.pdf](#)

Hooks

Yes, fully

Live birds which are blind or mutilated used as decoys

No

Please explain the reasons

>>> The wildlife law does not say anything about this mode of taking. However from the moral and ethical values of the society this action is not practical.

Tape recorders and other electronic devices

No

Please explain the reasons

>>> There is no as such a statement in the wildlife legislation of the country which prohibits using tape recorders and electronic devices as the hunting motives and the legal hunting practice is so scarce and the such technologise are not also applied by any body.

Electrocuting devices

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> eventhough it was not well specified in the legislation the statement which explains the need for authorization of the licensing body for use any messile or projectile also includes the prohibition of hunting by electrocuting.

Artificial light sources

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> Council of Ministers Regulation No 163/2008 adopted to provide for Wildlife development, conservation and utilization prohibits to set fire or drive or surround any wildlife by fire and the statement which indicates except with respect to nocturnal animals , conduct hunting during darkness.

You have attached the following documents to this answer.

[eth136632.pdf](#)

Mirrors and other dazzling devices

Yes, fully

Devices for illuminating targets

Yes, fully

Sighting devices for night shooting comprising an electronic image magnifier or image converter

Yes, fully

Explosives

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> Council of Ministers Regulation No 163/2008 adopted to provide for Wildlife development, conservation and utilization prohibits the use of any explosive projectile bomb or grenade

You have attached the following documents to this answer.

[eth136632.pdf](#)

Nets

Yes, fully

Traps

Yes, fully

Poison

Yes, fully

Poisoned or anaesthetic baits

Yes, fully

Semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

>>> Council of Ministers Regulation No 163/2008

You have attached the following documents to this answer.

[eth136632.pdf](#)

Hunting from aircraft, motor vehicles, or boats driven at a speed exceeding 5 km p/h (18 km p/h on the open sea)

Yes, fully

Please indicate the legislation under which the mode of taking is prohibited

You have attached the following documents to this answer.

[eth136632.pdf](#)

Other non-selective modes of taking

Yes, fully

7. Has your country granted exemptions from any of the above prohibitions in order to accommodate livelihoods uses? (AEWA Action Plan, paragraph 2.1.2(b); AEWA Strategic Plan 2019-2027, Target 1.1)

Not Relevant

8. Were any exemptions granted to the prohibitions required by paragraphs 2.1.1 and 2.1.2 of the AEWA Action Plan? (AEWA Action Plan, paragraph 2.1.3; AEWA Strategic Plan 2019-2027, Target 1.1)

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

9. Has a review of enforcement of and compliance with the domestic legislation relevant for AEWA implementation, [in particular the legislation which caters for the obligations under paragraphs 2.1 and 4.1 of the AEWA Action Plan], been undertaken in your country after MOP7? (AEWA Strategic Plan 2019-2027, Actions 1.1(c) and 2.2(c))

No

Was a review undertaken before MOP7?

No

10. Has your country used the AEWA Conservation Guidelines on National Legislation for the Protection of Species of Migratory Waterbirds and their Habitats?

Notice: Before clicking on the above hyperlink, please keep **Ctrl button** on your keyboard to open the link in a new tab.

No

4.2. Species Action and Management Plans

13. Has your country provided financial or in-kind assistance for the development of new International Species Action or Management Plans? (Resolution 7.5)

No

Please explain the reasons

>>> The government is under severe financial constraint which does not consider the assistance of financial support.

14. Has a review and prioritization been undertaken in your country of the resources needed to develop national action plans in response to ISSAPs, implement those plans and coordinate their implementation?

(AEWA Strategic Plan 2019-2027, Action 1.2(g))

No

Please explain the reasons.

>>> There was no national single species action plan for review and there no prioritization been undertaken.

15. Does your country have in place or is your country developing a National Single Species Action Plan for any species/population for which an AEWA ISSAP has not been developed? (AEWA Action Plan, paragraph 2.2.2)

No

16. Has your country used the AEWA Conservation Guidelines for the preparation of National Single Species Action Plans for migratory waterbirds?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

4.3 Emergency Measures

17. Please report on any emergency situation that has occurred in your country over the past triennium and has threatened waterbirds. (AEWA Action Plan, paragraph 2.3)

Please indicate whether an emergency situation threatening waterbirds, such as botulism, chemical pollution, earthquake, extreme weather, fire, harmful algal bloom, infectious disease, introduction of alien species, lead poisoning, nuclear accident, oil spill, predation, volcanic activity, war or other emergency (please specify), has occurred in the country over the past triennium.

No emergency situation has occurred

18. Are there any other emergency response measures, different from the ones applied in response to the emergency situations reported above, that were developed and are in place in your country so that they can be used in future in emergency cases?

No

19. Has your country used the AEWA Conservation Guidelines on identifying and tackling emergency situations for migratory waterbirds?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

Please explain the reasons. What was used instead as a basis for dealing with emergency situations?

>>> Strengthening the information exchange system at all levels from top to the ground level and when emergency occurs the experts are used to travel at site and investigate the cause of mortality and the the correction measures.

4.4 Re-establishments

20. Is your country maintaining a national register of re-establishment projects occurring or planned to occur wholly or partly within your country? (Resolution 4.4)

No

21. Is there a regulatory framework for re-establishments of species, including waterbirds, in your country (AEWA Action Plan, paragraph 2.4)?

No

22. Has your country considered, developed or implemented re-establishment projects for any species/population listed on AEWA Table 1? (AEWA Action Plan, paragraph 2.4)

No

23. Has your country used the AEWA conservation Guidelines on the translocation of waterbirds for conservation purposes?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

Please explain the reasons. What was used instead as a basis for dealing with the issue?

>>> There is no any system established because of capacity limitations.

4.5 Introductions

24. Does your country have legislation in place, which prohibits the introduction into the environment of non-native species of animals and plants which may be detrimental to migratory waterbirds? (AEWA Action Plan, paragraph 2.5.1)

No

Please explain the reasons

>>> There is a future plan to develop a legislation which prohibits the introduction into the environment of non-native species.

25. Does your country impose legislative requirements on zoos, private collections, etc. in order to avoid the accidental escape of captive animals belonging to non-native species which may be detrimental to migratory waterbirds? (AEWA Action Plan, paragraph 2.5.2)

No

Please explain the reasons

>>> Zoos and private collections are not priority issues in the country as we don't have many zoos and private collections that triggers the accidental escape of captive animals belonging to non-native species.

26. Has your country considered, developed or implemented programmes to control or eradicate non-native species of waterbird so as to prevent negative impacts on indigenous species? (AEWA Action Plan, paragraph 2.5.3)

Not applicable

Please explain

>>> We don't have any problem of non-native species in the country as there is strict control of the introduction from other sources abroad.

27. Has your country considered, developed or implemented programmes to control or eradicate other non-native species (in particular aquatic weeds and terrestrial predators) so as to prevent negative impacts on migratory waterbirds? (AEWA Action Plan, paragraphs 2.5.3 and 4.3.10 and Resolution 5.15)

Yes

Please list the non-native species for which relevant action has been undertaken

>>> The most serious weed which is affecting most water bird habitats is Water Hyacinth which is expanding in major wetlands of the country. The government is now trying to eradicate this weed in three lakes of Tana, Zeway and Koka.

Please provide further information for each relevant programme

>>> The three lakes Lakes Tana, Zeway and Koka are important water bird habitats seriously affected by non-native weeds and 55,000ha of Lake Tana, 1,127ha of Lake Zeway and 2,284ha of Lake Koka wetland habitats require great attention from the government and international partners working on water bird conservation.

28. Has your country used the AEWA Conservation Guidelines on avoidance of introductions of non-native waterbird species?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

Yes

Please provide details

>>> Our institution is an authoritative body which is responsible for any wildlife issues and people have visited our office recently to request for a licence to import bird from India as a pet but because we know the detrimental effects of introduction of non-native species as issued in the AEWA Conservation Guideline we rejected the request of the licence. The birds to be introduced were 60.

4.6 Seabirds

The country has maritime territories and the AEWA seabird conservation priorities are relevant for the country:

No

Pressures and Responses

5. Habitat Conservation

5.1 Habitat Inventories

39. Has your country identified the network of all sites of international and national importance for the migratory waterbird species/populations listed on Table 1? (AEWA Action Plan, paragraph 3.1.2; AEWA Strategic Plan 2019-2027, Action 3.1(a))

Yes

Please provide full reference, e.g. title, year, authors, etc. or a web link

>>> The Important Bird Area (IBA) book which was published in 1996 by Ethiopian Wildlife and Natural History Society (<http://datazone.birdlife.org/userfiles/file/IBAs/AfricaCntryPDFs/Ethiopia.pdf>) and A First Directory of Ethiopian Wetlands published in 2019 and Authors Prof. Abebe Getahun, Prof Brook Lemma, Prof. Seyoum Mengistu (<https://africa.wetlands.org/en/download/5026/>)

You have attached the following documents to this answer.

[Ethiopia.pdf](#)

Have you reviewed, confirmed and communicated to the AEWA Secretariat after MOP7 the inventory of known nationally and internationally important sites in your country?

Yes

Please confirmed when this process was concluded and when the inventory was communicated to the AEWA Secretariat

>>> It was in 2019 when the A first Directory of the Ethiopian Wetlands book was published and as AEWA is a facilitator of the the Climate Resilient Flyway project which has been implemented in Ethiopia since 2016 and this book was an output of this project.

Field for additional information (optional)

>>> Many of the nationally and internationally important wetland sites for water birds in the country have been well identified which are supporting the AEWA species in Table1.. However their management is very poor which are degrading very fast and require urgent correction actions.

40. If your country has identified or is currently identifying the networks of sites of international and national importance, were the AEWA Conservation Guidelines on the preparation of site inventories for migratory waterbirds used?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

Yes

5.2. Conservation of Areas and Habitats

41. Has your country assessed the future implications of climate change for protected areas and other sites important for waterbirds (i.e. resilience of sites to climate change)? (Resolution 5.13)

For one or more single sites

No

For the national protected area network

No

42. Which sites that were identified as important, either internationally or nationally, for Table 1 migratory waterbird species/populations have been designated as protected areas under the national legislation and have management plans that are being implemented, including with the aim to increase resilience to the effects of climate change? (AEWA Action Plan, paragraph 3.2.1; AEWA Strategic Plan 2019-2027, Target 3.3)

Please report separately on internationally important sites, nationally important sites and buffer zones.

Reporting on designation and management of nationally important sites. (Sites of national importance excludes the sites already reported above as internationally important)

All sites of national importance

Total number

>>> 30

Total area (ha)

>>> 1000,000

Number of nationally important sites under national protection designation

>>> 0

Area of national importance under national protection area designation

>>> 0

Please rate the effectiveness of the national protection designation

Low

DESIGNATION GAP FILLING

No

MANAGEMENT GAP FILING

No

44. Is the network of nationally and internationally important sites for migratory waterbirds integrated into your country's water- and land-use policies and planning and decision-making processes? (AEWA Strategic Plan 2019-2027, Target 3.4)

No

45. Has your country used the AEWA Conservation Guidelines on the management of key sites for migratory waterbirds?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

46. Has the Critical Site Network (CSN) Tool for the AEWA area been accessed and used in your country? (Resolution 7.9)

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

47. Following MOP7, has your country been involved in the establishment of innovative, international, multi-stakeholder partnerships to guide the development and implementation of habitat management, creation and restoration projects in the wider environment? (AEWA Strategic Plan 2019-2027, Action 4.4(a))

No

Pressures and Responses

6. Management of Human Activities

6.1. Hunting

48. Does the legislation of your country implement the principle of sustainable use of waterbirds, as envisaged in the AEWA Action Plan, taking into account the full geographical range of the waterbird populations concerned and their life history characteristics? (AEWA Action Plan, paragraph 4.1.1; AEWA Strategic Plan 2019-2027, Target 2.2)

No

Please explain the reasons

>>> This is not relevant for the country as hunting is not an issue.

49. Does your country have an established system for the collection of harvest data, which covers the species/populations listed in Table 1? (AEWA Action Plan, paragraph 4.1.3; AEWA Strategic Plan 2019-2027, Action 2.1(b))

No

Please explain the reasons

>>> As the waterbird hunting practice in the country is very low or harvest data is not a priority and is not applicable.

50. Has your country phased out the use of lead shot for hunting in wetlands? (AEWA Action Plan, paragraph 4.1.4; AEWA Strategic Plan 2019-2027, Action 2.2(d))

Partially

When was lead shot use in wetlands partially banned?

>>> 2012

What legislation is in place?

>>> The legislation in place is the Environmental pollution proclamation which was adopted in 2002 and following that there are guidelines in treating pollutants to avoid public health risks and environmental hazards.

You have attached the following documents to this answer.

[Proc_No._300-2002_Environmental_Pollution_Control.pdf](#)

Who enforces this legislation?

>>> Environment, Forest and Climate Change Commission

What proportion of the country's territory (or wetlands) is covered by the ban?

>>> 30%

Has your country introduced self-imposed and published timetable for banning fully the use of lead shot for hunting in wetlands?

No

Please explain the reasons

>>> Little attention is provided by the government to do this as the practice of using lead shot in wetlands rarely exists.

Has assessment of compliance with the legislation been undertaken?

Yes

Please explain what was compliance with legislation found to be:

Good (almost full compliance)

Field for additional information (optional)

>>> There is a plan to include in the legislation when the wildlife law is revised in the near future.

51. Are there measures in your country to reduce/eliminate illegal taking? (AEWA Action Plan, paragraph 4.1.6; AEWA Strategic Plan 2019-2027, Action 2.2(e))

Yes

How would you rate the effectiveness of the measures?

Low

Please provide details and reasons for the low level of effectiveness.

>>> Poor law enforcement at all levels of the government structure

52. Does your country maintain an adequate system for making realistic estimates of the number of waterbirds taken illegally? (AEWA Strategic Plan 2019-2027, Action 2.1(b))

No

53. Is legally binding proficiency testing for hunters, including amongst other things bird identification, in place in your country? (AEWA Action Plan, paragraph 4.1.8; AEWA Strategic Plan 2019-2027, Target 2.2)

No

54. Are best practice codes and standards for hunting in place in your country in support of enforcement of hunting laws and regulations? (AEWA Action Plan, paragraph 4.1.7; AEWA Strategic Plan 2019-2027, Target 2.3)

Yes

What do these cover?

Other (please specify)

>>> A code taking into consideration the rainfall distribution of the hunting area and the game bird breeding season.

Please provide details on each item selected above

>>> The rainfall distribution pattern of the country varies from one region to another and this is highly correlated with the availability of nesting materials and breeding habitat for the water birds. In this regard the Central highlands of the country have a hunting season from June to November and the Southern and Eastern parts of the country have hunting season from March to August.

Please rate the degree of application of these best practice codes and standards:

High (almost always applied)

Please provide details and reasons for the high degree of application

>>> Hunting of Great and Common Snopes is the most frequently used hunting practice in the central highlands of Ethiopia. The hunting is conducted strictly from August to October.

Please rate the effectiveness these best practice codes and standards in supporting enforcement of hunting laws and regulations:

Medium (effective to some extent in supporting enforcement of hunting laws and regulations)

55. Has your country used the AEWA Conservation Guidelines on sustainable harvest of migratory birds?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl** button on your keyboard to open the link in a new tab.

No

6.2. Ecotourism

56. Is wetland- and waterbird-related ecotourism integrated into your country's national tourism development strategies or other relevant national strategies? (AEWA Action Plan, paragraph 4.2.1; AEWA Strategic Plan 2019-2027, Action 2.5(c))

No

Please explain the reasons

>>> Upto now the attention provided to wetland and water bird ecotourism was very though bird watching tourists visiting the country regularly visit the wetlands in watching water birds which have great potential the ecotourism. However, very recently the 10 year perspective development plan which considers the tourism aspect as one pillar take it as priority and it will have enough coverage in the Tourism Development Strategy.

57. Are there existing ecotourism initiatives in your country specifically based on migratory waterbirds and their habitats? (AEWA Strategic Plan 2019-2027, Target 2.5)

No

Please explain the reasons

>>> As low attention was given in the tourism sector with no proper institutional set up such initiatives did not exist.

6.3. Other human activities

58. Have restrictions on use of lead fishing weights been introduced in your country? (AEWA Action Plan, paragraph 4.3.12). When answering this question please also consider question 78 in chapter 7 - Research and monitoring.

No

If appropriate, please provide further details.

>>> The practice of lead fishing does not exist as game bird hunting and water fowl hunting are not common practices.

59. Does your country have legislation in place, which provides for Strategic Environmental Assessment/Environmental Impact Assessment (SEA/EIA) of activities potentially negatively affecting natural habitats or wildlife? (AEWA Action Plan, paragraph 4.3.1; AEWA Strategic Plan 2019-2027, Target 3.5)

Yes, but not being implemented properly or at all

You have attached the following documents to this answer.

[Proc No. 299-2002 Environmental Impact Assessment.pdf](#)

Please explain the reasons

>>> Lack of strong institutional set up and coordination for enforcement of the adopted legislation negatively affecting natural habitats of wildlife.

Does this legislation apply to the entire country or only to particular states/provinces thereof?

Only to particular states/provinces

Please provide details

>>> The working relations and coordinations between the Federal state and Regional States is very weak so that there are even many occasions the Regional states do not follow the hierarchy to adopt their own legislation based on their regional context.

Do the SEA/EIA processes consider waterbirds and habitats on which they depend?

Yes

Please provide details

>>> The law orders any project implemented near wetlands should consider the needs of water birds and their habitats. However, the law enforcement is very low during implementation phase they don't strictly follow all the requirements obtained from the EIA study.

Do the SEA/EIA processes include public participation?

No

Please provide details

>>> It is a contract deal between the owner of the project and the government institution which has the mandate to regulate the implementation of the EIA study. Public participation is very low.

60. Are there any other legal and/or administrative measures in your country to avoid, mitigate and compensate for adverse impacts of development activities on the sites of national and international importance for migratory birds? (AEWA Strategic Plan 2019-2027, Target 3.5)

No

Please explain the reasons

>>> There is no legislation adopted.

61. In the last three years, has your country used SEA/EIA for all relevant projects, including energy sector projects such as renewable energy developments and power lines installation, to assess the impact of proposed projects on migratory waterbird species listed on Table 1 and/or habitats/sites on which they depend? (AEWA Action Plan, paragraph 4.3.1, Resolution 5.11 and Resolution 5.16; AEWA Strategic Plan 2019-2027, Action 3.5(b))

Yes, all proposed projects

Where an SEA/EIA has identified a likelihood of significant negative impacts on migratory waterbirds, have steps been taken to avoid these impacts, including avoidance of protected areas and other sites of importance for migratory waterbirds?

No

62. Do you maintain a record of the cases of adverse impacts of development activities and other pressures on sites of national and international importance for migratory waterbirds in your country? (AEWA Strategic Plan 2019-2027, Action 3.5(a))

Yes

63. Has your country used the AEWA Conservation Guidelines on how to avoid, minimize or mitigate impact of infrastructural developments and related disturbance affecting waterbirds?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

64. Please report on the implementation of Resolution 5.11 on Power Lines and Migratory Waterbirds.

64.1. Are relevant stakeholders, including government agencies, scientific bodies, nongovernmental organisations and the energy sector, being regularly consulted in order to monitor jointly the impacts of power lines on waterbirds and to agree on a common policy of action?

No

64.2. Has a baseline of waterbird distribution, population sizes, migrations and movements (including those between breeding, resting and feeding areas) been established as early as possible in the planning of any power line project, over a period of at least five years, and with particular emphasis on those species known to be vulnerable to electrocution or collision?

Yes

64.3 If such studies, as described in the question above, have identified any risks, has every effort been made to ensure these are avoided?

Not applicable

64.4. Have the location, route and direction of new power lines been designated on the basis of national zoning maps?

Not Applicable

64.5. Has, wherever possible, the construction of power lines along major migration flyways and in habitats of conservation importance* been avoided, where such construction is likely to have significant effects on waterbirds?

* such as Special Protection Areas under the EU Birds Directive, Important Bird Areas, protected areas, Ramsar sites, the West/Central Asian Site Network for Siberian Crane and other waterbirds and other critical sites as identified by the Critical Site Network (CSN) Tool for the African-Eurasian region.

Not applicable

64.6. Are bird-safe designs in the construction of new power infrastructure, including measures designed to reduce electrocution and collisions being used in your country?

No

Please explain the reasons. What are the constraints preventing implementation of this activity?

>>> There is no strong law of enforcement.

64.7. Have those sections of existing power lines that are causing relatively high levels of waterbird injury and/or mortality due to electrocution and/or collision been identified?

Partially

64.8. Where sections of existing power lines have been identified to cause relatively high levels of waterbird injury and/or mortality due to electrocution and/or collision, have they been modified as a matter of priority?

No

64.9. Is there in your country regular monitoring and evaluation of the impact of power lines on waterbird

populations at the national scale?

No

64.10. Is there in your country regular monitoring and evaluation of the effectiveness of mitigation measures put in place to minimise the impact of power lines on waterbird populations?

No

64.11. Have the measures contained in Resolution 5.11. been included in your country's National Biodiversity Strategies and Action Plans and relevant legislation?

No

65. Has your country used the AEWA Conservation Guidelines on how to avoid or mitigate impact of electricity power grids on migratory birds in the African-Eurasian region?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

66. Please report on the implementation of Resolution 5.16 on Renewable Energy and Migratory Waterbirds.

66.1. Has a national sensitivity and zoning mapping to avoid overlap of renewable energy developments with areas of importance for migratory waterbirds been developed in your country?

No

66.2. Have any international environmental guidelines, recommendations and criteria been followed in your country for impact assessment of renewable energy developments and the utilization of renewable energy sources?

No

66.3. Is post-construction monitoring being undertaken of the renewable energy installations and associated infrastructure in your country?

No

66.4. Where damage cannot be avoided or mitigated, has compensation for damages to biodiversity been provided?

No

Operate wind farms in ways that minimise bird mortality, for example by introducing shortterm shutdowns during peak migration and minimising lighting in wind farms.

No

Dismantling of wind turbines in existing installations, should waterbird mortality have an effect on the population status of a species and other mitigation measures have proved insufficient.

Not applicable

Focusing research efforts on alleviating the negative effects on waterbirds from wind farms, such as the mapping of the main migration corridors and migration crossings for waterbirds also allowing the optimising of wind farm layouts.

No

66.6. Have any specific measures been put in place to assess, identify and reduce potential negative impacts of biofuel production on migratory waterbirds and their habitats?

Not applicable

Please explain

>>> Biofuel production projects do not exist in the country. The main energy development projects of the government are geothermal, Wind Farms and hydropower energy production

66.7. Have the measures contained in Resolution 5.11. been included in your country's National Biodiversity Strategies and Action Plans and relevant legislation?

No

67. Has your country used the following AEWA Conservation Guidelines - Renewable Energy Technologies and Migratory Species: Guidelines for Sustainable Deployment (Resolution 6.11)?

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

No

Please explain the reasons. What other guidance has been used instead?

>>> Renewable energy development is a strong policy by the government which has been as a good initiative in the Climate Resilient Green Economy Strategy. But this has not taken into consideration the AEWA Conservation Guidelines.

68. Is by-catch of waterbirds in fishing gear taking place in your country? (Resolution 3.8) (Please respond to this question only with respect to species, which are NOT considered seabirds. Seabird by-catch is dealt with in section 4.6 Seabirds)

No

Please provide details

>>> This is not a problem in the country and not taken as a priority activity.

69. Please report on the implementation of Resolution 5.12 on Adverse Effects of Agrochemicals on Migratory Waterbirds in Africa (this question is applicable only to Contracting Parties in Africa).

69.1. Have relevant government authorities developed and implemented regulations on the trade and application of agrochemicals known to have a direct or indirect adverse effect on waterbirds?

No

Please explain the reasons

>>> It is not taken as a priority with other development agenda on the forefront.

69.2. Is the use of such agrochemicals regulated around nationally and internationally important sites for migratory waterbirds, particularly in wetlands, also taking into account run-offs from agriculture affecting aquatic ecosystems?

No

Please explain the reasons

>>> Weak institutional set up and coordination of among different institutions is very weak.

69.3. Are there any steps undertaken to control or reduce the use of avicides in areas frequented by populations listed in Table 1 of the Agreement?

No

Please explain the reasons

>>> weak institutional set up for implementation.

69.4. Have education and training activities been implemented for relevant target groups on the proper use of agrochemicals that may have possible adverse effect on waterbirds?

No

Please explain the reasons

>>> Weak institution arrangement for implementation.

70. Has any project / initiative been implemented in your country that promotes the integration of cultural and provisioning ecosystem services of migratory waterbirds into policy and decision-making affecting them or their habitats? (AEWA Strategic Plan 2019-2027, Target 2.6)

No

Pressures and Responses

7. Research and Monitoring

71. Does your country have in place waterbird monitoring schemes for the AEWA species? (AEWA Strategic Plan 2019-2027, Actions 1.4(a) and 1.4(b))

Yes

Covering the breeding period

Guidance: Including pre- and post-breeding sites of concentration, such as moulting sites close to breeding areas

No monitoring schemes in place

Please explain the reasons.

>>> Funding opportunities and expertise are very limited to cover all the breeding and monitoring scheme. We are conducting only one period scheme during the winter.

Covering the passage period

Partially

Please provide details. (incl. list the species covered OR not covered (whichever list is shorter))

>>> The migrant ducks such as Northern Shoveler, Northern Pintail, Common Teal, Ferruginous Duck and Common Pochard and other species such as White Stork, Black-tailed Godwit, Caspian Plover, Curlew Sandpiper, Whiskered and White-winged Black Terns.

You have attached the following documents to this answer.

[IWC Data Ethiopia 2019.xls](#)

[IWC Waterbird Count Data 2018.xls](#)

Is information on drivers of population trends also being collected?

Yes

Please provide details

>>> The drivers of population trends are those factors which are contributing to the fluctuation in the population size of water birds by negatively affecting the wintering and staging grounds of the water birds. This can be explained by man made and natural factors because of pollution, wetland reclamation, agriculture, introduction and expansion of Alien Invasive Species of Plants and the the aftermath of the climate change impacts..

You have attached the following documents to this answer.

[IWC Report 2019.pdf](#)

Covering the non-breeding/wintering period

Partially

Please provide details. (incl. list the species covered OR not covered (whichever list is shorter))

>>> Common Crane, Ruff, Tringa species of Maarsh Sand piper, Green Sand Piper, Common Sand Piper, Common Greenshank, wood Sand Piper and Spotted Redshank. Also the Charadrius species of Common Ringed Plover and Little Ringed Plover,. Other birds covering the wintering period are Calidris Spp. of Little Stint, Temminck's Stint and Dunlin.

Is information on drivers of population trends also being collected?

Yes

Please provide details

>>> The drivers of population trends are those factors which are contributing to the fluctuation in the population size of water birds by negatively affecting the wintering and staging grounds of the water birds. This can be explained by man made and natural factors because of pollution, wetland reclamation, agriculture, introduction and expansion of Alien Invasive Species of Plants and the the aftermath of the climate change impacts..

72. Is data collected through the International Waterbird Census or other relevant monitoring schemes being actively used in your country to inform national-level implementation of AEWA? (AEWA Strategic Plan 2019-2027, Action 1.5(a))

Yes

Please provide details

>>> The energy development in the country is growing fast and this must be aligned with the national legislation adopted and the international conventions the country ratified for the conservation of the wildlife in general and the migratory water birds in particular. The country is also a member of the CMS ETF Network. To achieve these goals we provide the water bird monitoring data to those who are deployed in energy development schemes such as the Ethiopian Electric Power (EEP) and their technical partners.

73. Has your country supported, technically or financially, other Parties or Range States in designing appropriate monitoring schemes and developing their capacity to collect reliable waterbird population data? (Resolution 5.2)

Considering to provide support

Which country(ies) are being considered for support?

>>> Neighbouring countries such as Somalia, Djibouti, Eritrea or Sudan request us technical support on collecting waterbird population data we can support them. As to financial aspects the country does not have enough money to support the scheme. Unfortunately all the countries mentioned above are not parties to the Agreement.

Please provide details

>>> The country has long experience collecting water bird data and we have experts who have developed good skills of counting water birds and if the request arises from any of our neighboring countries we are willing to support from an expertise point of view.

74. **Has your country used the AEWA Conservation Guidelines on waterbird monitoring?**

Notice: Before clicking on the above hyperlink, please keep pressing the **Ctrl button** on your keyboard to open the link in a new tab.

Yes

Please provide details

>>> We have already started. But we need time to measure the progress of our effort.

75. Has your government provided over the past triennium funds and/or logistical support for the International Waterbird Census and/or other waterbird monitoring scheme at international or national level? (Resolution 6.3)

Yes

Nationally

Yes

Please provide details

>>> Our institution has in its plan the International Water bird Census program at national level beginning from 2011.

Internationally

No

Please explain the reasons

>>> The country has shortage of financial resources to allocate for International Waterfowl Census schemes.

76. Has your country donated funds to the African-Eurasian Waterbird Fund in the past triennium (Resolution 6.3, Resolution 7.7)?

Notice: Before clicking on the above hyperlink, please keep pressing the Ctrl button on your keyboard to open the link in a new tab.

No

Please explain the reason

>>> The government of the country does not have enough financial capacity to support the African-Eurasian Water bird Fund compared to other conservation and development priorities which are considered as crucial

77. **(Applicable to African Contracting Parties only)** Were the periods of breeding and of pre-nuptial migration for all AEWA-listed species and their respective populations occurring on the territory of your country identified at national level? (Resolution 7.8)

No

78. Has the impact of lead fishing weights on waterbirds been investigated in your country? (AEWA Action

Plan, paragraph 4.3.12). When answering this question please also consider question 58 in chapter 6 – Management of human activities.

No

Are there plans to investigate the impact of lead fishing weights on waterbirds in your country?

No

Please provide reason(s)

>>> Lead fishing is not applicable in the country.

Pressures and Responses

8. Education and Information

8.1. Communication, Education and Public Awareness

79. Has your country developed and implemented programmes for raising awareness and understanding on waterbird conservation and about AEWA specifically? (Strategic Plan 2009-2017, Objective 4, Target 4.3 and AEWA Action Plan, paragraphs 6.1-6.4, Resolution 3.10, Resolution 5.5; Resolution 6.10)

Guidance: Such programmes should consist of a series of established, long-term communication activities, which are guided by clearly defined goals, target audiences and communication channels. A programme does not constitute a single, one-off communication activity, product or event. In other words, an established national programme to raise awareness and understanding on waterbird conservation and about AEWA would ideally be a number of targeted communication activities which are guided by a communication plan and are backed by sufficient human and financial resources.

No

Please explain the reasons

>>> The AEWA CEPA matters do not develop very well because of little financial and expertise capacity.

80. Has a National AEWA Focal Point for Communication, Education and Public Awareness (CEPA) been designated by your country? (Resolution 5.5; Resolution 6.10)

Yes

Is the National CEPA Focal Point from the government or non-governmental sector?

Government

Has the AEWA CEPA Focal Point begun coordinating national implementation of the AEWA Communication Strategy?

No

Please explain reasons

>>> The AEWA CEPA Focal point is a new designation which does not exist previously and need time to go through the different documents dealing with the AEWA CEPA and create working relations with other partners in the country to develop the communication system on AEWA matters.

How can the cooperation between the appointed AEWA CEPA Focal Point and the Ramsar CEPA Focal Points be described?

There is no cooperation

Field for additional information (optional)

>>> The country is not a party to Ramsar and the working relations between RAMSAR and AEWA matters in the country do not exist. But the country is trying to make some progress to be a party to Ramsar make efforts to develop proclamation for the sustainable use of wetlands in the country

81. Have measures been taken by your country to implement the provisions related to "Education and Information" in the AEWA Action Plan over the last triennium? (AEWA Action Plan, Paragraphs 6.1-6.4)

No

Please explain the reasons

>>> The AEWA CEPA matters in the country as a whole is at its early stage of implementation and requires more time to develop the system of education and information.

82. Have World Migratory Bird Day (WMBD) activities been carried out in your country during this reporting cycle? (Resolution 5.5)

Yes

Please describe the activity/activities briefly and upload any sample materials, links or photos available related to the activity/event.

>>> WMBD celebration event with Bird watching and Educational Activities held at the Rift Valley Lakes of Zeway and Abijata which support the lives of many migratory birds used as feeding and resting grounds.

You have attached the following documents to this answer.

[WMBD_Lake_Zeway-Water_Hyacinth.JPG](#)

[WMBD_Lake_Abijata_Marabou_Stork_and_Great_White_Pelican.JPG](#)

WMBD Event photo.jpg

WM Bird Day Educational Event.JPG

WMBD Lake Abijata Pelicans.JPG

WMBD Celebration.jpg

WMBDC Report.docx

83. Has your country provided funding and/or other support, as appropriate (e.g. expertise, network, skills and resources) towards the implementation of the AEWA Communication Strategy and/or towards priority CEPA activities in the AEWA Strategic Plan 2019-2027? Please consider both national and international funding and different types of support provided. (Resolution 6.10)

No

You have attached the following documents to this answer.

WMBD Event photo.jpg

Please explain the reasons

>>> The financial and skilled man power of the country to deal with prior CEPA activities is at a low level to support with funding and expertise.

Field for additional information (optional)

>>> The country is in need of the support of other partners both financial and expertise towards the implementation of the AEWA communication Strategy as it is in the category of the least developed countries and resource is a measure constraint.

Pressures and Responses

9. Implementation

84. Have you undertaken a national assessment of the resources needed for the delivery of the AEWA Strategic Plan 2019-2027? (AEWA Strategic Plan 2019-2027, Action 5.6.(b))

No

Please explain the reasons

>>> Because of the Covid-19 pandemic many activities related to the implementation of the AEWA strategic Action plan are lagging behind schedule in the country one such example is no assessment of the resources needed for the delivery of the AEWA strategic plan 2019-2027 was not undertaken

Field for additional information (optional)

>>> There are some activities carried out since 2019 such as the Northern Bald Ibis Status study on its wintering ground in the country and also resource mobilization to carry out activities related to the conservation of Berga wetland which is the breeding habitat of White-winged Flufftail. We also made an effort to mobilize fund to celebrate the 2020 World Migratory Bird Day and we were successful to do that. But all these activities have been done without prior need assessment undertakings of the resources need to implement the AEWA Strategic Plan.

85. Has your country approached non-contracting party range states to encourage them to accede to the Agreement? (Resolution 3.10; AEWA Strategic Plan 2019-2027, Target 5.2)

Report only on activities over the past triennium

No

Please explain the reasons

>>> Many states which are neighbours of the country that did not accede to the agreement are under high political instability and it was difficult to consider as a priority action to approach them accede to the agreement.

Field for additional information (optional)

>>> If situations allow in the coming years we have a plan to approach South Sudan, Somalia, Eritrea and Djibouti and provide information on the significance of accession to the agreement. especially with countries which share transboundary wetlands like South Sudan and Eritrea which are hotspots of biodiversity and need cooperation.

86. Does your country have in place a national coordination mechanism for implementation of AEWA, possibly linking to national coordination mechanisms for other biodiversity Multilateral Environmental Agreements (MEAs)? (Strategic Plan 2019-2027, Action 5.3(b))

Guidance: Such mechanism can be a dedicated cross-institutional working group, involving representatives of the civil society and other relevant stakeholders, aimed at planning, coordinating and reporting the implementation of the Agreement in the country. Alternatively, the implementation of AEWA at national level can be coordinated as an extension of larger national coordination mechanisms for other MEAs, such as National Ramsar Committees or CBD NBSAPs coordination.

No

Please explain the reasons

>>> We have a coordination mechanism for implementation of AEWA with Ethiopian Biodiversity Institute which is responsible for implementation of NBSAP but requires further strengthening to have in place a strong national institutional setup for implementation of AEWA .

Field for additional information (optional)

>>> -

87. Have you undertaken a national assessment of the capacity needs for AEWA implementation? (AEWA Strategic Plan 2019-2027, Action 5.3.(e))

No

Please explain the reasons

>>> There was little time and capacity to assess the capacity need.

88. Has your country concluded, or considered concluding, twinning schemes between sites with other countries, the sites of which share common migratory waterbirds or conservation issues? (Resolution 5.20)

Yes

Please provide details on each twinning arrangement

>>> There were earlier twinning scheme with South Sudan which share transboundary protected areas of Gambela National Park on the Ethiopian side and Boma National Park on the South Sudan side both countries having extensive wetland systems in these protected areas for the conservation AEWA water bird species and the country is considering to conclude this twinning scheme in the futures when situations like the security issues in both countries allow.

89. Are those officers in your country's government responsible for AEWA implementation co-ordinated and engaged with national processes contributing towards the Aichi Targets and the assessment of achieving these targets? (AEWA Strategic Plan 2019-2027, Action 5.4(a))

No

Please explain the reasons

>>> There was no any significant initiative of national processes contributing to the Aichi Targets and the assessment of achieving these targets.

90. Are those officers in your country's government responsible for AEWA implementation co-ordinated and engaged with national processes contributing towards the relevant Sustainable Development Goals and the assessment of achieving these goals? (AEWA Strategic Plan 2019-2027, Action 5.4(a))

No

Please explain the reasons

>>> There is no strong institutional set up to coordinate and engage with the national processes contributing towards the relevant SDGs and the assessment of achieving these goals and this ultimately also has an impact on the AEWA implementation.

91. Are those officers in your country's government responsible for AEWA implementation co-ordinated and engaged with national processes to implementation and assess the delivery of the Strategic Plan for Migratory Species 2015-2023? (AEWA Strategic Plan 2019-2027, Action 5.4(a))

No

Please explain the reasons

>>> There is limitation of capacity for the AEWA implementation officers to coordinate and engage with national processes to implementation and assess the delivery of the Strategic Plan for Migratory Species 2015 -2023

92. Are the AEWA priorities incorporated into your country's National Biodiversity Strategies and Action Plan (NBSAP) and/or other similar strategic plans and policies (Resolution 6.3; AEWA Strategic Plan 2019-2027, Target 5.5)?

92.1 NBSAP

No

Please explain the reasons

>>> The NBSAP of the country is more generic dealing with biodiversity and people's livelihood and does not include the specific concerns of waterbird conservation and the AEWA priorities are not included.

You have attached the following documents to this answer.

[1281.docx](#)

92.2 Other strategic plans and policies

Yes

Please name the other strategic planning processes

>>> There had been a drafting process of stand alone policy and regulation for the conservation and wise use of wetlands and the AEWA priorities as part of scientific conservation efforts are mentioned in the draft policy.

Sustainable Development Goals

No

Please explain the reasons

>>> Limitations of both human and financial resources

Aichi Targets

No

Please explain the reasons

>>> Limitations of both human and financial resources. Time was also another factor that any activity could not be done especially within this challenging time of Covid-19 pandemic with a lot unfavorable situations including a lot of movement restrictions.

Strategic Plan for Migratory Species

No

Please explain the reasons

>>> Limitations of human and financial resources. Time was also another factor that any activity could not be done especially within this challenging time of Covid-19 pandemic with a lot unfavorable situations including a lot of movement restrictions.

94. How would your country suggest promoting further links between the biodiversity MEAs to which your country is a Contracting Party, so as to make your work more efficient and effective?

>>> By developing strong information exchange mechanisms among countries to fill their capacity gaps.

95. Has your country donated funds to the AEWA Small Grants Fund (SGF) over the past triennium? (Resolution 7.1)

No

Please explain the reasons

>>> As a developing nation the country does not have the capacity to donate resource to the AEWA Small Grants Fund rather needs to receive fund from AEWA. As a result over the past triennium the country has received 9,000 US Dollar support from AEWA to implement the White-winged Fluff-tail(*Srothrura ayresi*) single species action plan.

Field for additional information (optional)

>>> -

96. Has your country donated other funding or provided in-kind support to activities coordinated by the Secretariat?

No

Please explain the reasons

>>> The country is in the category of least developed countries and has financial limitations to donate as support to activities coordinated by the Secretariat.

97. Has your country prioritised and allocated a Junior Professional Officer (JPO) to the UNEP/AEWA Secretariat for Technical Committee support or for any other area of work? (Resolution 7.11, Resolution 7.12)

Not Applicable: the country has no arrangement with the UN to provide JPOs

98. Please report on the implementation of Resolution 6.21 on Resource mobilisation for the implementation of AEWA.

98.1 Did your country's government provide in the last triennium financial and/or in-kind resources to support national activities which are intended to achieve the objectives of this Agreement, particularly those in line with the AEWA Strategic Plan including the AEWA Plan of Action for Africa, and in accordance with your national plans, priorities and programmes?

Yes

Please describe the resources provided

>>> Material and financial support for the Celebration of World Migratory Bird Day, Water Bird Monitoring program and for the implementation of the Single Species Action Plans of White-wing Flufftail and Northern Bald Ibis.

98.2 Does your country's government have unpaid dues to the AEWA Trust Fund (annual assessed contributions to the Agreement's budget as approved by each session of the Meeting of the Parties)?

No

98.3 Has your country's government provided funding to support developing countries, in particular least developed countries and small island developing States, as well as countries with economies in transition,

to meet their obligations under AEWA, and the implementation of the AEWA Plan of Action for Africa 2019-2027? Under this question please report for support provided outside of formal and established intergovernmental cooperation. For the latter, please refer to the next question 98.4.

No

Please explain the reasons

>>> The country is in the category of of least developed countries and rather need funding from other developed countries to meet its obligation under AEWA, and the implementation of the AEWA-POA 2019-2027.

98.4 Does your country's government participate in any South-South, North-South or triangular cooperation to enhance financial and technical support for the successful implementation of AEWA activities?

No

Please explain the reasons

>>> Upto now regional cooperations for the implemetation of the AEWA activities are not known.

98.5 Does your country's government use innovative financing mechanisms for implementing the AEWA Strategic Plan such as a (national) Migratory Waterbirds Fund?

No

Please explain the reasons

>>> The country has limitartions of human and financial resources and implementation of the AEWA strategic Action plan is only possible by funding from other partners.

98.6 Does the implementation of AEWA in your country benefit from synergies between biodiversity-related conventions at national level, amongst others, through information sharing on potential funding opportunities and sharing of financial resources such as the Desertification Fund, Green Climate Fund, the Adaptation Fund, and the Global Environmental Facility?

No

Please explain the reasons

>>> There was no formal request to get funding opportunities from the focal institution responsible for the implementation of AEWA.

Optionally you can provide additional information on section 9. Implementation

>>> The country had other means of funding from 2018--2020 from the German government for the implementation of the Climate Resilient Flyway (CRF) project which supported waterbird and wetland conservation in the Central Rift Valley Lakes.

Pressures and Responses

10. Climate Change

99. Please outline relevant climate change research, assessments and/or adaptation measures that are relevant to migratory waterbirds and which have been undertaken or planned in your country. (Resolution 5.13)

a. Research and studies of climate change impacts on waterbirds

Planned

Please provide details

>>> The country is one of the ten climate change prone countries and Climate change and related researches are very essential to address the issues influencing food security and the health of wetland ecosystem as wetland ecosystems are the basic components of the environment ensuring sustained livelihood for people and improving the wellbeing of migratory water birds.

b. Assessment of the potential vulnerability to climate change of key habitats used by waterbird species (including those outside protected area networks) (Please note that the question asks about habitats, rather than sites. Question 41 in Section 5, sub-section 5.2 investigates vulnerability of sites to climate change)

Planned

c. Assessment of the potential vulnerability of waterbird species to climate change.

Planned

d. Review of relevant national conservation policies relevant to waterbirds and climate change.

Planned

e. National Action Plan for helping waterbirds adapt to climate change (as a separate implementation process or as part of a larger national framework for biodiversity adaptation to climate change. Please note that Question 42 in Section 5, sub-section 5.2 investigates national measures for increasing resilience of the ecological network for waterbirds to climate change).

Planned

f. Other undertaken or planned relevant activities.

No

100. Has your country used the AEWA Conservation Guidelines on measures needed to help waterbirds to adapt to climate change?
