

23rd MEETING OF THE STANDING COMMITTEE
26-27 June 2023, Virtual meeting format

**DRAFT REVISED FORMAT FOR NATIONAL REPORTS ON THE
IMPLEMENTATION OF AEWA 2021-2024**

Introduction

The 8th Session of the Meeting of the Parties (MOP8) adopted the format for National Reports to MOP9 on the implementation of AEWA which covers the period 2021-2024. It was based on the national report format for 2018-2020 used for MOP8 reporting and introduced new reporting requirements as per the Strategic Plan 2019-2027.

As per Resolution 7.1, after each session of the MOP the Technical Committee (TC) shall assist the Standing Committee in revising, amending, and enhancing the format for National Reports, as necessary, so as to bring it in line with any relevant decisions of the MOP. This document represents an initial partial revision of the format for National Reports to MOP9 in accordance with the decisions of MOP8. All proposed changes are presented in track changes mode.

The changes to questions 3, 9, 36, 37, 54 and 57 are the result of the work of the Technical Committee ad hoc working group on sustainable harvest that was convened last triennium to assist with this task amongst others. Please see the Excel files in Annexes 1 and 2 to this document which provide proposed reporting templates for questions 3 and 57 respectively.

The Technical Committee reviewed this draft revised reporting format at its 18th meeting on 14-16 March 2023 and approved it other than Chapter 11 on Avian Influenza which is currently being revised. In addition, the reporting format is currently being reviewed also with respect to topics such as site network reporting (AEWA TC Workplan 2023-2025 task 3.1), capacity gaps and needs reporting (AEWA TC Workplan 2023-2025 task 8.1) and items related to the Strategic Plan monitoring (AEWA TC Workplan 2023-2025 task 8.3). The Technical Committee is aiming at finalising this work on those tasks and delivering within the next few months a new revised version of the reporting format with respect to the topics mentioned above.

Once the Technical Committee has agreed on the new revised version, it will be submitted to the Standing Committee by correspondence for review and approval for use in the national reporting to MOP9.

The national reporting to MOP9 is proposed to be split into two modules. The first module that concerns harvest data reporting, is to be launched as soon as possible in 2023 with a reporting deadline in mid-2024. This earlier deadline is proposed in view of the need of harvest data for undertaking a rapid assessment of sustainability of harvest (task 4.7 of the AEWA TC Workplan 2023-2025) and other dependent tasks (e.g. task 2.4 on sustainable harvests and the socio-economic importance of waterbirds). For this module, the relevant templates will be extracted from the national reporting format and made available in the AEWA Online Reporting System.

The remaining of the national reporting format will be launched in 2024 as the general reporting module with a deadline for submission 180 days before the opening date of MOP9 as per Resolution 8.3.

Action Requested from the Standing Committee

The Standing Committee is requested to review this current proposed revision of the format for National Reports to MOP9 and approve it to allow the launch in 2023 of the module on harvest data reporting. For the remaining of the national reporting format, the StC is requested to agree to review and approve it by correspondence once the technical Committee has finalised its revision.
