

L'Accord sur la conservation des oiseaux d'eau migrateurs d'Afrique-Eurasie (AEWA)

# Report on the implementation of AEWA for the period 2009-2011

The format for reports on the implementation of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) for the period 2009-2011 was approved at the 4th session of the Meeting of the Parties (15-19 September 2008, Antananarivo, Madagascar) by Resolution 4.7. Further amendments were endorsed by the Standing Committee in August 2011 in accordance with operative paragraph 11 of Resolution 4.7. This format has been constructed following the AEWA Action Plan, the AEWA Strategic Plan 2009-2017 and resolutions of the Meeting of the Parties (MOP).

In accordance with Article V.1(c) of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds, each Party shall prepare to each ordinary session of the MOP a National Report on its implementation of the Agreement and submit that report to the Agreement Secretariat not later than 120 days before the session of the MOP. The 5th Session of the Meeting of the Parties (MOP5) is taking place on 14-18 May 2012 in La Rochelle, France; therefore **the deadline for submission of National Reports is 14 January 2012**.

The AEWA National Reports 2009-2011 will be compiled and submitted through the CMS Family Online Reporting Facility, which is an online reporting tool for the whole CMS Family. However, AEWA will be the first of the CMS-related treaties to use the CMS Family Online Reporting System for its reporting to MOP5. The CMS Family Online Reporting System was developed in 2010-2011 by the UNEP-World Conservation Monitoring Centre (UNEP-WCMC) in close collaboration with and under the guidance of the UNEP/AEWA Secretariat.

As a new product, the system may still need some refining and improving, we therefore request your understanding: any feedback or suggestions on your side would be greatly appreciated.

The online reporting system offers flexibility and versatility superior to the previously used paper-based reporting and the UNEP/AEWA Secretariat hopes that the Parties will find it to be more convenient and efficient. In particular, it will make information more easily accessible and also enhance ways of using it. In this context, Resolution 4.7 also requests UNEP to assist in the development of an analytical tool and calls upon Parties to support this initiative and provide financial resources and thus strengthen the online format for national reporting in collaboration with UNEP-WCMC. The online reporting system brings national reporting to a different level, enabling the information provided to be used much more effectively; it also serves as a tool for self-assessment by Parties. In addition, it can help to enhance cooperation and coordination between various stakeholders in your country by making the national reporting more of a collective, collaborative and continuous process.

To contact the UNEP/AEWA Secretariat please send your inquiries to aewa national reporting@unep.de.

# 1. General Information

Name of reporting Contracting Party

> Ethiopia

Date of entry into force of AEWA in the Contracting Party > 01/02/2010

List any reservations that the Contracting Party has made (if any) upon deposition of its instruments of accession on provisions of the Agreement or its Action Plan in accordance with Article XV of AEWA

> None

# 2. Institutional Information

Please update information on the National AEWA Administrative Authority, the National Focal Points, the Designated National Respondent and the other contributors to this report.

# **Designated National AEWA Administrative Authority**

Full name of the institution

> Ethiopian Wildlife Conservation Authority

Name and title of the head of institution

> Dr. Kifle Argaw, Director General

# Designated National Respondent (DNR) in charge of the compilation and submission of the AEWA National Report 2009-2011

Please select from the list below as appropriate.

☑ The National Focal Point for AEWA Technical Committee (NFPTC) matters has been designated as the National Respondent

## Other contributors to the AEWA National Report 2009-2011

Please list the names and affiliations (institution, organisation) of the other contributors to this reports > Ethiopian Wildlife and Natural History Society which is a local conservation NGO and also a Bird life Partner of Ethiopia has provided us with the 2008 National Waterfowl Census Data. The institution is working closely with us in the conservation

of the wildlife resource of the country.

# **Status**

# 3. Species Status

Please select from the drop-down list below only the species that occur in your country

# **AEWA Species - Tachybaptus ruficollis / Little Grebe**

## **English Common name(s):**

Little Grebe

## French Common name(s):

Grébe castagneux, Grèbe castagneux

# **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country ☐ The species occurs in the country

## Native or non-native species

Please confirm whether the species is native or non-native to your country  $\ \square$  Native

# **AEWA Table 1 Categorisation**

Please indicate the AEWA Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☑ No information

#### Species Status - Field for additional information (optional)

Optionally you can provide additional information on the status of the species in the country > It is a common, sometimes abundant, endemic resident in Ethiopia above 2100m on freshwater lakes, marshes, streams and pools throughout the year.

#### **Legal Status**

(measures as per paragraph 2.1.1 of the AEWA Action Plan - applicable to species with populations listed on Column A of the AEWA Table 1)

Taking of birds and eggs prohibited

Deliberate disturbance prohibited

Possession or utilization of, and trade in, birds, eggs or any readily recognisable parts or derivatives prohibited

. ☑ Yes

#### **National Red List Status**

Is a National Red List of threatened species maintained in your country?

✓ No

#### Alien Species - Porphyrio porphyrio / Purple Swamphen

English Common name(s):
Purple Gallinule, Purple Swamphen
French Common name(s):
Poule sultane, Talève sultane

#### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country  $\ \square$  The species occurs in the country

#### Native or non-native species

Please confirm whether the species is native or non-native to your country  $\ensuremath{\square}$  Native

#### **Pressures and Responses**

#### 4. Species Conservation

#### 4.2 Single Species Action Plans

2. Please report on the progress of turning the International Single Species Action Plans (ISSAP), for species whose populations are listed on Column A of Table 1, developed under or recognised by AEWA, into National Single Species Action Plans (NSSAP). (AEWA Action Plan, paragraph 2.2)

Please clarify the relevance of the AEWA International Single Species Action Plans or the other recognised plans (Dalmatian Pelican, Pygmy Cormorant, Red-breasted Goose, Marbled Teal, Slender-billed Curlew and Audouin's Gull) to your country

☑ None of the International Single Species Action Plans is relevant

3. Do you have in place or are you developing a National Single Species Action Plan for any species/population for which an AEWA ISSAP has not been developed? (AEWA Action Plan, paragraph 2.2.2)

✓ No

4. Did you use the AEWA Guidelines for the preparation of National Single Species Action Plans for migratory waterbirds?

✓ No

#### 4.5 Introductions

14. Has an eradication programme been considered, developed or implemented for any non-native waterbird species in your country?

☑ No

## Pressures and Responses 5. Habitat Conservation

#### 5.1 Habitat Inventories

17. If your country has identified or is currently identifying the networks of sites of international and national importance, have you used the AEWA Guidelines on the preparation of site inventories for migratory waterbirds? 
☑ Yes

#### 5.2. Conservation of Areas

19. Has your country used the AEWA Guidelines on the management of key sites for migratory waterbirds?

✓ No

20. Have you accessed and used the Critical Site Network (CSN) Tool for the AEWA area?  $\hfill \ensuremath{\square}$  No

## Pressures and Responses 6. Management of Human Activities

#### 6.1. Hunting

21. Does your country have an established system for the collection of harvest data, which covers the species listed in Table 1? (AEWA Action Plan, paragraph 4.1.3)

## 22. Has your country phased out the use of lead shot for hunting in wetlands? (AEWA Action Plan, paragraph 4.1.4)

☑ Fullv

When was the lead shot use in wetlands banned? What legislation is in place? Who does enforce this legislation?

> In December 2011. There is no legislation taking place. However it has been transferred on circular basis to all concerned institutions and hunting companies.

Field for additional information (optional)

> There is a plan to include in the legislation when the wildlife law is revised in the near future.

### 23. Are there measures in your country to reduce/eliminate illegal taking? (AEWA Action Plan, paragraph 4.1.6)

Yes

How would you rate the effectiveness of the measures? 
☑ Moderate

### 24. Has your country used the AEWA Guidelines on sustainable harvest of migratory birds? | Yes |

Please provide details

> We have gouta systems and season limits for hunting the migratory birds in the country.

#### 6.2. Other human activities

25. Does your country have legislation in place, which provides for Strategic Environmental Assessment/Environmental Impact Assessment (SEA/EIA) of activities potentially negatively affecting natural habitats or wildlife? (AEWA Action Plan, paragraph 4.3.1)

26. In the last three years, has your country used SEA/EIA for all relevant projects to assess the impact of proposed projects on migratory waterbird species listed on table 1 and/or habitats/sites on which they depend? (AEWA Action Plan, paragraph 4.3.1)

☑ No (not any)

28. Has your country undertaken steps towards the adoption/application of measures to reduce the incidental catch of seabirds and combat Illegal Unregulated and Unreported (IUU) fishing practices in the Agreement area? (Resolution 3.8) 
☑ №

Please explain the reasons

> Ethiopia is not part of the sea coast region.

#### **Pressures and Responses**

#### 7. Research and Monitoring

## 29. Does your country have waterbird monitoring schemes for the AEWA species in place? (Strategic Plan 2009-2017, Objective 3, Target 2)

✓ Yes

#### Covering the breeding period

☑ Partially

#### Please provide details

> We are conducting monitoring schemes of the AEWA species in the framework of the African Waterfowl Census program in January which can also be a breeding period for some resident bird species in the country.

#### Covering the passage/migration period

☑ No monitoring schemes in place

#### Please explain the reasons

> We do not have enough resource and manpower to conduct the monitoring during the passage period.

#### Covering the non-breeding/wintering period

☑ Fully

#### Please provide details

> We have already began to conduct the wintering period monitoring scheme in 2011 and we have a plan to conduct the wintering period monitoring in 2012 which is going to cover almost all parts of the country.

#### 30. Have you used the AEWA Guidelines for a waterbird monitoring protocol?

Yes

#### Please provide details

> We have already started. But We need time to measure the progress of our effort.

# 31. List (or provide links to lists) of research related to waterbirds and their conservation that has been undertaken or results published in the past triennium (Strategic Plan 2009-2017, Objective 3, Target 5)

> There is no any publication

# 32. Has your government provided over the past triennium funds and/or logistical support for the International Waterbird Census at international or national level? (Strategic Plan 2009-2017, Objective 3, Target 1)

✓ Yes

#### **Nationally**

#### Please provide details

 Our institution has in its plan the International Water bird Census program at national level beginning from 2011.

#### Internationally

✓ No

#### Please explain the reasons

> The country has shortage of financial resources to allocate for International Waterfowl Census schemes.

## Pressures and Responses 8. Education and Information

#### 8.1. AEWA Communication Strategy

33. Has your country developed and implemented programmes for raising awareness and understanding on waterbird conservation and about AEWA? (Strategic Plan 2009-2017, Objective 3, Target 3 and AEWA Action Plan, paragraphs 6.1-6.4) 
☑ No

Please explain the reasons

The country has become a contracting party to AEWA only a year ago and it needs a few extra years to develop and implement programs for raising awareness and understanding on water bird conservation and about AEWA.

34. Has your country provided funding and other support, as appropriate (e.g. expertise, network, skills and resources), secured for the implementation of the AEWA Communication Strategy? (Strategic Plan 2009-2017, Objective 3, Target 1 and Resolution 3.10) 
☑ №

Please explain the reasons

- > The financial and skilled man power of the country is at a lower level to support with funds and expertise.
- 35. In Resolution 3.10 the Meeting of the Parties encouraged Contracting Parties to host AEWA Exchange Centres for their respective regions. Has your country considered/shown interest in hosting a Regional AEWA Exchange Centre? (Strategic Plan 2009-2017, Objective 3, Target 2 and Resolution 3.10)

☑ Not considered yet

Please provide details on the answer given above

- > The country has become a contracting party to AEWA only a few years ago and it needs some years to be involved in such activities.
- 36. Training for CEPA (Communication, Education and Public Awareness) at national level is supposed to be conducted by staff, which has been trained in the framework of the AEWA Training of Trainers programme. Has such training taken place in your country in the past triennium? (Strategic Plan 2009-2017, Objective 3, Target 2)

Applicable only for countries in regions where Training of Trainers programme has taken place  $\ \square$  No

Please explain the reasons

> There has not been training of trainers program in the Framework of AEWA in our country.

Field for additional information (optional)

> The country expects the Training of Trainers program in the framework of AEWA in the future

# Pressures and Responses 9. Implementation

### 37. Has your country approached non-contracting parties to encourage them to ratify the Agreement? (Resolution 3.10)

Report only on activities over the past triennium  $\ \square$  No

#### Please explain the reasons

> The country has ratified the accession to AEWA very recently and it has been doing its domestic task only to strengthen its capacity at home through information exchange with AEWA and other relevant International conservation organizations .

Field for additional information (optional)

>

# 38. Has your country supported/developed international co-operation projects for the implementation of the Agreement, according to the priorities outlined in the AEWA International Implementation Tasks (IIT) for the current triennium? (Resolution 3.11) ☑ No

#### Please explain the reasons

> Because of the low economic position of the country it cannot support or develop any international cooperation projects in the current triennium. This to a greater extent emerges from the government's priority to invest on food securitity programs as the nation is highly food insecure.

food insecure rather than supporting conservation projects.

#### Field for additional information (optional)

> In the coming years we shall have great opportunity to strengthen our cooperation with neighboring countries of eastern Africa to work together for the betterment of our migratory waterbirds status.

## 39. Has your country resourced the AEWA Small Grants Fund over the past triennium? (Strategic Plan 2009-2017, Objective 5, Target 5)

✓ No

#### Please explain the reasons

> As a developing nation the country did not have the capacity to resource the AEWA Small Grants Fund rather needs to receive fund from AEWA. As a result over the past triennium the country has received 20,000 Euro support from AEWA to

implement the White-winged Fluff-tail( Srothrura ayresi) single species action plan.

Field for additional information (optional)

**>** -

# 40. Does your country have in place a national coordination mechanism for implementation of AEWA, possibly linking to national coordination mechanisms for other biodiversity Multilateral Environmental Agreements (MEAs)? (Strategic Plan 2009-2017, Objective 5, Target 8)

 $\ \ \square$  No

#### Please explain the reasons

> It requires extra time to have in place a national coordination mechanism for implementation of AEWA as it is a new member state to the AEWA. It has become a party to the AEWA in February 2010.

Field for additional information (optional)

>

## 41. How would you suggest promoting further links between the biodiversity MEAs to which your country is a Contracting Party, so as to make your work more efficient and effective?

> By developing strong information exchange mechanisms among countries to fill their capacity gaps.

Optionally you can provide additional information on section 9. Implementation

# Pressures and Responses 10. Avian Influenza

# 42. What issues have proved challenging in responding nationally to the spread of the Highly Pathogenic Avian Influenza (HPAI) in the last triennium and what further guidance or information would be useful in this respect?

#### List challenges

> There were no challenges. Because Highly Pathogenic Avian Influenza has not been reported in the country in the last triennium. only low Pathogenic Avian Influenza(H8 N4) has been reported in 2006 on White-faced Whistling Ducks at Lakes Ziway and Bishoftu in the Rift Valley.

#### List required further guidance or information

> At the moment there is no further guidance or information needed.

#### Field for additional information (optional)

> The Avian Influenza Task force is highly organized working system in the country led by the deputy Prime Minister and a stand by force to take immediate measures if the incidence occurs.Regular Surveillance is carried out and there is sample collection

jointly with the National Animal Health Diagnostic and Investigation Center in the Rift Valley Lakes.

### 43. Have you visited and used as a reference the AIWEb (the Avian Influenza, Wildlife and the Environment web site)?

Yes

Field for additional information (optional)

\_

Optionally you can provide additional information on section 10. Avian Influenza

**>** 

#### 11. Confirmation

#### Confirmation of information verification and approval for submission

#### Please confirm:

In addition a scanned copy of an official letter from the relevant state institution, approving the report for submission, can be attached.

☑ I declare that the information provided in the Report on the implementation of AEWA for the period 2009-2011 has been verified and the report has been approved for submission by the appropriate state institution in the country.

#### **Date of submission**

> 31/12/2011
