

## **DRAFT RESOLUTION 3.1**

### **CLOSURE OF THE REGISTER OF INTERNATIONAL PROJECTS**

---

---

*Recalling* Resolution 1.5 on the establishment of a register of international projects,

*Noting* that until now the rate of submission of projects for inclusion in the register has been very low,

*Aware* that maintaining the register in up to date status in the light of the large amount of projects in the Agreement area with very dynamic timetables is a far too complicated task,

*Further aware* that the register is largely out of date and did not play the role it was meant to play,

*Noting* the recommendation of the Technical Committee from its Sixth meeting to close the register of international projects,

*Further noting* that the proposed for development online national report format will entirely replace the functions of the register,

*The Meeting of the Parties:*

*Decide* to close the register of international projects.
