

## RESOLUTION 3.1

### CLOSURE OF THE REGISTER OF INTERNATIONAL PROJECTS

---

---

*Recalling* Resolution 1.5 on the establishment of a register of international projects, which sought to record those projects where Parties, Range States and other partners were working collaboratively to help take forward the objectives of the Agreement,

*Noting* that until now the rate of submission of projects for inclusion in the register has been very low,

*Aware* that in the light of the large number of projects in the Agreement area with very dynamic timetables keeping the register up to date status is a prohibitively complicated task,

*Further aware* that the register is largely out of date and has not fulfilled its intended purpose,

*Noting* the recommendation of the Technical Committee from its 6<sup>th</sup> meeting to close the register of international projects,

*Further noting* that the online national report format, which is being proposed for development, will entirely replace the functions of the register.

*The Meeting of the Parties:*

*Decides* to close the register of international projects.
