

# Report on the implementation of AEWA for the period 2009-2011

The format for reports on the implementation of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds (AEWA) for the period 2009-2011 was approved at the 4th session of the Meeting of the Parties (15-19 September 2008, Antananarivo, Madagascar) by Resolution 4.7. Further amendments were endorsed by the Standing Committee in August 2011 in accordance with operative paragraph 11 of Resolution 4.7. This format has been constructed following the AEWA Action Plan, the AEWA Strategic Plan 2009-2017 and resolutions of the Meeting of the Parties (MOP).

In accordance with Article V.1(c) of the Agreement on the Conservation of African-Eurasian Migratory Waterbirds, each Party shall prepare to each ordinary session of the MOP a National Report on its implementation of the Agreement and submit that report to the Agreement Secretariat not later than 120 days before the session of the MOP. The 5th Session of the Meeting of the Parties (MOP5) is taking place on 14-18 May 2012 in La Rochelle, France; therefore **the deadline for submission of National Reports is 14 January 2012.**

The AEWA National Reports 2009-2011 will be compiled and submitted through the CMS Family Online Reporting Facility, which is an online reporting tool for the whole CMS Family. However, AEWA will be the first of the CMS-related treaties to use the CMS Family Online Reporting System for its reporting to MOP5. The CMS Family Online Reporting System was developed in 2010-2011 by the UNEP-World Conservation Monitoring Centre (UNEP-WCMC) in close collaboration with and under the guidance of the UNEP/AEWA Secretariat.

As a new product, the system may still need some refining and improving, we therefore request your understanding: any feedback or suggestions on your side would be greatly appreciated.

The online reporting system offers flexibility and versatility superior to the previously used paper-based reporting and the UNEP/AEWA Secretariat hopes that the Parties will find it to be more convenient and efficient. In particular, it will make information more easily accessible and also enhance ways of using it. In this context, Resolution 4.7 also requests UNEP to assist in the development of an analytical tool and calls upon Parties to support this initiative and provide financial resources and thus strengthen the online format for national reporting in collaboration with UNEP-WCMC. The online reporting system brings national reporting to a different level, enabling the information provided to be used much more effectively; it also serves as a tool for self-assessment by Parties. In addition, it can help to enhance cooperation and coordination between various stakeholders in your country by making the national reporting more of a collective, collaborative and continuous process.

To contact the UNEP/AEWA Secretariat please send your inquiries to [aewa\\_national\\_reporting@unep.de](mailto:aewa_national_reporting@unep.de).

## 1. General Information

### Name of reporting Contracting Party

> Switzerland

### Date of entry into force of AEWA in the Contracting Party

> 01.11.1999

### List any reservations that the Contracting Party has made (if any) upon deposition of its instruments of accession on provisions of the Agreement or its Action Plan in accordance with Article XV of AEWA

> None

## 2. Institutional Information

Please update information on the National AEWA Administrative Authority, the National Focal Points, the Designated National Respondent and the other contributors to this report.

### Designated National AEWA Administrative Authority

Full name of the institution

> Federal Office for the Environment (FOEN)

Name and title of the head of institution

> Bruno Oberle, Director

## Status

### 3. Species Status

Please select from the drop-down list below only the species that occur in your country

**AEWA Species - *Gavia stellata* / Red-throated Diver**

**English Common name(s):**

Red-throated Diver, Red-throated Loon

**French Common name(s):**

Plongeon catmarin

#### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

You have attached the following Web links/URLs to this answer.

Birds of Switzerland - Red-throated Loon

#### Native or non-native species

Please confirm whether the species is native or non-native to your country

☒ Native

#### AEWA Table 1 Categorisation

Please indicate the AEWA Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column B - Category 2(c)

#### Species Status - Breeding

Does the species occur in the country during the breeding period?

☒ No

#### Species Status - Passage

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

#### Species Status - Non-breeding/wintering

Does the species occur in the country during the non-breeding/wintering period?

☒ Yes

#### Latest population estimate

No information

☒ No information

**Legal Status**

**(measures as per paragraph 2.1.2 of the AEWA Action Plan - applicable to species with populations listed on Column B of the AEWA Table 1)**

Taking of birds and eggs during reproductive or rearing period and pre-nuptial migration prohibited

☒ Yes

Regulated modes of taking in place

☒ Yes

Established limits of taking (birds or eggs per hunter per day or season)

☒ Yes

Prohibited possession or utilization of, and trade in, birds and eggs of the populations which have been taken in contravention of any prohibition laid down pursuant to the provisions of paragraph 2.1.2 of the AEWA Action Plan (i.e. in the reproductive or rearing period, pre-nuptial migration, using modes of taking that are under regulation, and excess over the limits) as well as the possession or utilization of, and trade in, any parts of such birds and their eggs

☒ Yes

**National Red List Status**

**Is a National Red List of threatened species maintained in your country?**

☒ Yes

**Do National Red Lists have a legal status in your country?**

☒ Yes

**Latest assessment**

Indicate the category of the species on the National Red List. If your national categories differ from these ones, indicate those which most closely correspond to them.

☒ Not Assessed

## AEWA Species - *Gavia arctica* / Black-throated Diver

### English Common name(s):

Arctic Loon, Black-throated Diver

### French Common name(s):

Plongeon arctique

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

You have attached the following Web links/URLs to this answer.

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Infrequent and small numbers

### **Species Status - Non-breeding/wintering**

Does the species occur in the country during the non-breeding/wintering period?

☒ No

## **AEWA Species - *Sterna nilotica* / Gull-billed Tern**

### **English Common name(s):**

Gull-billed Tern

### **French Common name(s):**

Sterne hansel

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **AEWA Table 1 Categorisation**

Please indicate the AEWa Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column A - Category 2

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

## **AEWA Species - Sterna caspia / Caspian Tern**

### **English Common name(s):**

Caspian Tern

### **French Common name(s):**

Sterne caspienne

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **AEWA Table 1 Categorisation**

Please indicate the AEWA Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column A - Category 1(c)

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

## **AEWA Species - *Sterna bengalensis* / Lesser Crested Tern**

### **English Common name(s):**

Lesser Crested Tern, Lesser Crested-Tern

### **French Common name(s):**

Sterne voyageuse

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Non-native

### **Species Status**

Please select whether status will be reported for breeding, passage or non-breeding/wintering population

Both options can be selected

☒ Non-breeding/wintering

### **Species Status - Non-breeding/wintering**

### **Previous population estimate**

Occasional records

Both options can be selected

☒ Occasionally recorded, most likely natural vagrants

## **AEWA Species - *Sterna sandvicensis* / Sandwich Tern**

### **English Common name(s):**

Sandwich Tern

### **French Common name(s):**

Sterne caugek

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

### **Species Status - Non-breeding/wintering**

Does the species occur in the country during the non-breeding/wintering period?

☒ No

## **AEWA Species - Sterna hirundo / Common Tern**

### **English Common name(s):**

Common Tern

### **French Common name(s):**

Sterne pierregarin

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

## **AEWA Species - *Sterna paradisaea* / Arctic Tern**

### **English Common name(s):**

Arctic Tern

### **French Common name(s):**

Sterne arctique

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

### **Species Status - Non-breeding/wintering**

Does the species occur in the country during the non-breeding/wintering period?

☒ No

## AEWA Species - *Sterna albifrons* / Little Tern

### English Common name(s):

Little Tern

### French Common name(s):

Sterne naine

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### Native or non-native species

Please confirm whether the species is native or non-native to your country

☒ Native

### AEWA Table 1 Categorisation

Please indicate the AEWA Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column A - Category 3(b)

☒ Column A - Category 3(c)

### Species Status - Breeding

Does the species occur in the country during the breeding period?

☒ No

### Species Status - Passage

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

### Species Status - Non-breeding/wintering

Does the species occur in the country during the non-breeding/wintering period?

☒ No

## **AEWA Species - *Chlidonias leucopterus* / White-winged Tern**

### **English Common name(s):**

White-winged Tern

### **French Common name(s):**

Guifette leucoptère

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **AEWA Table 1 Categorisation**

Please indicate the AEWA Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column C - Category 1

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

### **Species Status - Non-breeding/wintering**

Does the species occur in the country during the non-breeding/wintering period?

☒ No

## **AEWA Species - *Chlidonias niger* / Black Tern**

### **English Common name(s):**

Black Tern

### **French Common name(s):**

Guifette noire

### **Confirmation of species occurrence**

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

### **Native or non-native species**

Please confirm whether the species is native or non-native to your country

☒ Native

### **AEWA Table 1 Categorisation**

Please indicate the AEWa Table 1 category(ies) applicable to the population(s) of this species occurring in the country.

☒ Column B - Category 2(c)

### **Species Status - Breeding**

Does the species occur in the country during the breeding period?

☒ No

### **Species Status - Passage**

Does the species occur in the country during the passage period?

☒ Yes

Are quantitative estimates for the passage numbers available?

☒ No

Please provide a qualitative estimate for the passage numbers

☒ Regular, but small numbers

## Alien Species - *Dendrocygna javanica* / Lesser Whistling Duck

### English Common name(s):

Lesser Whistling Duck

### French Common name(s):

Dendrocygne siffleur

### Confirmation of species occurrence

Please confirm the occurrence of the species in the country

☒ The species occurs in the country

# Pressures and Responses

## 4. Species Conservation

### 4.1 Legal Measures

**1. Were any exemptions granted to the prohibitions laid down in paragraphs 2.1.1 and 2.1.2 of the AEWA Action Plan? (AEWA Action Plan, paragraph 2.1.3)**

☒ No

**Optionally you can provide additional information on section 4.1. Legal Measures**

> The federal hunting law prohibits the taking of birds listed in Column A of Table 1.

Seven bird species listed in Column B of Table 1 are hunted in Switzerland (i.e. *Anas penelope*, *A. acuta*, *A. clypeata*, *A. querquedula*, *A. strepera*, *Melanitta fusca* and *M. nigra*). However, the taking of these bird species is regulated according to paragraph 2.1.2 of the Action Plan by the Swiss hunting legislation.

### 4.2 Single Species Action Plans

**2. Please report on the progress of turning the International Single Species Action Plans (ISSAP), for species whose populations are listed on Column A of Table 1, developed under or recognised by AEWA, into National Single Species Action Plans (NSSAP). (AEWA Action Plan, paragraph 2.2)**

Please clarify the relevance of the AEWA International Single Species Action Plans or the other recognised plans (Dalmatian Pelican, Pygmy Cormorant, Red-breasted Goose, Marbled Teal, Slender-billed Curlew and Audouin's Gull) to your country

☒ At least one of the International Single Species Action Plans is relevant

**Please report on each relevant ISSAP**

#### **National Single Species Action Plan for *Oxyura leucocephala* / White-headed Duck**

For *Oxyura leucocephala* / White-headed Duck

☒ No NSSAP

Please explain the reasons

> White-headed Duck is a vagrant. The conservation measures in place (i.e. protected areas for waterbirds and migrants, species protected by law) are supporting the implementation of the ISSAP.

#### **National Single Species Action Plan for *Crex crex* / Corncrake**

For *Crex crex* / Corncrake

☒ No NSSAP

Please explain the reasons

> SVS – BirdLife Switzerland oversees the implementation of the Corncrake Action Plan in Switzerland and implements together with the Swiss Ornithological Institute, the Federal Office for the Environment, the cantonal authorities – and most important with those farmers participating in the project, conservation activities.

In the year 2000, SVS – BirdLife Switzerland developed and implements a species conservation programme, which is actually being revised.

In 2003, the “Swiss Species Recovery Programme for Birds” was launched by the SVS/BirdLife Switzerland, the Swiss Ornithological Institute at Sempach and the Federal Office for the Environment FOEN, with *Crex crex* being one out of 50 species to be addressed.

You have attached the following Web links/URLs to this answer.

[Species conservation programme for the Corncrake \(de\)](#) - General information about the Corncrake, information on conservation activities, annual reports of the programme

#### **National Single Species Action Plan for *Aythya nyroca* / Ferruginous Duck**

For *Aythya nyroca* / Ferruginous Duck

☒ No NSSAP

Please explain the reasons

> *Aythya nyroca* is a regular, but rare migrant and winter visitor. So far, only few breeds were recorded. Due to low number of individuals recorded, the existing measures are considered to fully support the ISSAP (i.e.

Aythya nyroca is observed in protected areas predominantly and the species is protected by law).

**3. Do you have in place or are you developing a National Single Species Action Plan for any species/population for which an AEWA ISSAP has not been developed? (AEWA Action Plan, paragraph 2.2.2)**

☒ Yes

**Please provide information on each species for which relevant action has been undertaken**

**National Single Species Action Plan for Ciconia ciconia / White Stork**

For Ciconia ciconia / White Stork

☒ NSSAP in place and being implemented

You have attached the following documents to this answer.

Plan d'action Cigogne blanche Suisse.pdf - Plan d'action Cigogne blanche Suisse

Please provide details

> The Swiss Action Plan for the White Stork describes the framework (aims, strategies, measures, protagonists a their roles, etc.) for the protection and conservation of this species in Switzerland. This means preserving and restoring appropriate habitats, creating and connecting new ones, so that the Swiss population can reach 300 breeding

pairs (estimated potential) by 2024.

Future conservation efforts in favour of the White Stork must aim at improving breeding success and reducing losses during migration and in the winter quarters. In Switzerland, it will be crucial to create and secure enough open and near natural grasslands. This can be achieved with the support of the land owners and the local and cantonal

authorities. On the breeding grounds as well as along the migratory routes, accidents with electric power lines are the most common avoidable cause of mortality. Here, it is technical measures which can bring efficient remedy; they must be implemented in cooperation with power companies.

**National Single Species Action Plan for Tringa hypoleucos / Common Sandpiper**

For Tringa hypoleucos / Common Sandpiper

☒ NSSAP in place and being implemented

**4. Did you use the AEWA Guidelines for the preparation of National Single Species Action Plans for migratory waterbirds?**

☒ Yes

Please provide details

> Wiedmer E. (2002): Analysis of the AEWA Conservation Guidelines with reference to Swiss legislation on the protection of nature, species, habitats and designated sites; Swiss Agency for the Environment, Forests and Landscape (SAEFL, working paper - no binding force)

**4.3 Emergency Measures**

**5. Please report on any emergency situation that has occurred in your country over the past triennium and has threatened waterbirds. (AEWA Action Plan, paragraph 2.3)**

Please indicate whether an emergency situation threatening waterbirds, such as botulism, chemical pollution, earthquake, extreme weather, fire, harmful algal bloom, infectious disease, introduction of alien species, lead poisoning, nuclear accident, oil spill, predation, volcanic activity, war or other emergency (please specify), has occurred in the country over the past triennium

☒ No emergency situation has occurred

**6. Are there any other emergency measures, which were not mentioned above, but were developed and are in place in your country?**

☒ No

**7. Did you use the AEWA Guidelines on identifying and tackling emergency situations for migratory waterbirds?**

☒ Yes

Please provide details

> Wiedmer E. (2002): Analysis of the AEWA Conservation Guidelines with reference to Swiss legislation on the protection of nature, species, habitats and designated sites; Swiss Agency for the Environment, Forests and Landscape (SAEFL, working paper - no binding force).

#### 4.4 Re-establishments

##### **8. Is there a regulatory framework for re-establishments of species, including waterbirds, in your country (AEWA Action Plan, paragraph 2.4)?**

☒ Yes

Please provide details

> The procedure for re-establishments of species is regulated in the Ordinance on Hunting and Protection of Wild Mammals and Birds (1988, SR 922.01, Art. 8). Any re-establishment requires approval by federal authorities.

##### **9. Are you maintaining a national register of re-establishment projects occurring or planned to occur wholly or partly within your country? (Resolution 4.4)**

☒ No

Please explain the reasons

> No re-establishment project for waterbird is occurring or is planned in Switzerland.

##### **10. Has your country considered, developed or implemented re-establishment projects for any species listed on AEWA Table 1? (AEWA Action Plan, paragraph 2.4)**

☒ No

#### 4.5 Introductions

##### **11. Does your country have legislation in place, which prohibits the introduction of non-native species of animals and plants, which may have a detrimental effect? (AEWA Action Plan, paragraph 2.5.1)**

☒ Yes, and being enforced

You have attached the following Web links/URLs to this answer.

Invasive species - Description of Switzerland's approach to invasive species

Please provide the following details: title of legislation, year of adoption, institution that adopted it, institution that enforces it

> A general duty of care is specified by the Federal Act on the Protection of the Environment (1983, RS 814.01, last revised in 2009; USG Art. 1 and 29a) and also by the Release Ordinance (2008, RS 814.911 FrSV Art. 1). Releases of alien animal and plant species are regulated by the Nature and Cultural Heritage Protection Act (1966, RS 451, last revised in 2006). Article 23 states: "The establishment of animals and plants of species, subspecies and breeds not native to the country or site is subject to approval by the Federal Council." The management of - among others - non-native bird species is regulated by the Hunting Ordinance (1988, SR 922.01, last revised in 2008) JSV). Art. 8 of the ordinance prohibits the release of the following waterbird species: *Alopochen aegyptiaca*, *Oxyura jamaicensis*, *Branta canadensis* and *Cygnus atratus*.

##### **12. Has your country introduced requirements to zoos, private collections, etc. in order to avoid the accidental escape of captive birds belonging to non-native species? (AEWA Action Plan, paragraph 2.5.2)**

☒ Yes, and being enforced

Please provide the following details: title of the document, year of adoption, institution that adopted it, institution that enforces it

> A general duty of care is specified by the Federal Act on the Protection of the Environment (1983, RS 814.01, last revised in 2009; USG Art. 1 and 29a) and also by the Release Ordinance (2008, RS 814.911 FrSV Art. 1).

##### **13. Does your country have in place a National Action Plan for Invasive Species (NAPIS) (in the framework of other MEAs, such as CBD, Bern Convention, and GISP (Global Invasive Species Programme) (Strategic Plan 2009-2017, Objective 1, Target 5)?**

☒ Being developed

Please provide starting date and expected finalisation date of the process

> Guidelines for the control of IAS have been adopted by the Federal Office for the Environment (FOEN). The

guidelines are the basis for the future elaboration of a strategy that aims at i) reducing the impacts of alien species on human health and on biodiversity, ii) controlling the costs for action and iii) providing practitioners with guidance for action in the field. In order to achieve these goals, a monitoring system emphasising early detection of IAS is being established, the exchange of information, scientific research and practical guidance is being boosted, a coordination platform has been set up and the implementation of existing legislation is being strengthened.

Regarding fauna, an action plan for the control of the Ruddy Shelduck (*Tadorna ferruginea*) was adopted and is being implemented. Further, the national action plan for crayfish includes measures to combat alien crayfish species (i.e. *Astacus leptodactylus*, *Orconectes limosus*, *Pacifastacus leniusculus* and *Procambarus clarkii*) that are vectors for the crayfish plague (*Aphanomyces astaci*). The invasion by the grey squirrel (*Sciurus carolinensis*) in Italy is being observed with the goal of avoiding its spread in southern Switzerland.

**14. Has an eradication programme been considered, developed or implemented for any non-native waterbird species in your country?**

☒ Yes

**Please provide information on each species for which relevant action has been undertaken**

**Eradication programme for *Oxyura jamaicensis* / Ruddy Duck**

For *Oxyura jamaicensis* / Ruddy Duck

☒ Eradication programme developed and being implemented

**Eradication programme for *Tadorna ferruginea* / Ruddy Shelduck**

For *Tadorna ferruginea* / Ruddy Shelduck

☒ Eradication programme developed and being implemented

You have attached the following Web links/URLs to this answer.

[Tadorna ferruginea \(fr\)](#) - Information on management, status and trends of *Tadorna ferruginea*

**15. Did you use the AEWA Guidelines on avoidance of introductions of non-native waterbird species?**

☒ Yes

# Pressures and Responses

## 5. Habitat Conservation

### 5.1 Habitat Inventories

**16. Has your country identified the network of all sites of international and national importance for the migratory waterbird species/populations listed on Table 1? (AEWA Action Plan, paragraph 3.1.2)**

☒ Yes

Please provide full reference, e.g. title, year, authors, etc. or a web link

> To date, 10 reserves for waterbirds and migrants of international importance and 26 reserves of national importance have been designated and are protected by virtue of the Ordinance on Waterbirds and Migratory Birds of International and National Importance (1991, SR 922.32).

You have attached the following Web links/URLs to this answer.

Réserves d'oiseaux d'eau et de migrateurs: descriptions des objets - Réserves d'oiseaux d'eau et de migrateurs: descriptions des objets

**17. If your country has identified or is currently identifying the networks of sites of international and national importance, have you used the AEWA Guidelines on the preparation of site inventories for migratory waterbirds?**

☒ Yes

Please provide details

> Wiedmer E. (2002): Analysis of the AEWA Conservation Guidelines with reference to Swiss legislation on the protection of nature, species, habitats and designated sites; Swiss Agency for the Environment, Forests and Landscape (SAEFL)

### 5.2. Conservation of Areas

**18. Which sites that were identified as important, either internationally or nationally, for Table 1 migratory waterbird species/populations have been designated as protected areas under the national legislation and have management plans that are being implemented? (AEWA Action Plan, paragraph 3.2.1)**

Please report on both internationally and nationally important sites

☒ Reporting on designation and management of internationally important sites

☒ Reporting on designation and management of nationally important sites

#### All sites of international importance

Total number

> 10

Total area (ha)

> 12465

Out of the above total: number of protected sites

> 10

Out of the above total: protected area (ha)

> 12465

Number of protected sites with management plans in place which are being implemented

> 1

Area under protection (in ha) covered by management plans which are being implemented

> 6014

#### All sites of national importance

Total number

> 26

Total area (ha)

> 10411

Out of the above total: number protected sites

> 26

Out of the above total: protected area (ha)

> 10411

Number of protected sites with management plans in place which are being implemented

> 0

Area under protection (in ha) covered by management plans which are being implemented

> 0

### **Examples of best practice (optional)**

If any site, in your opinion, represents an outstanding process of management planning or implementation, please highlight it as an example of best practice (alternatively provide a web link or attach a file)

> There is no systematic management planning process for protected sites in Switzerland. However, some NGOs owning protected sites and certain cantons carry out management measures in a number of sites.

### **19. Has your country used the AEWA Guidelines on the management of key sites for migratory waterbirds?**

☒ No

### **20. Have you accessed and used the Critical Site Network (CSN) Tool for the AEWA area?**

☒ Yes

Please give examples of how you have used the CSN Tool

> Information source for species ranges and population boundaries

## Pressures and Responses

### 6. Management of Human Activities

#### 6.1. Hunting

**21. Does your country have an established system for the collection of harvest data, which covers the species listed in Table 1? (AEWA Action Plan, paragraph 4.1.3)**

☒ Yes

You have attached the following Web links/URLs to this answer.

Statistique fédérale de la chasse - La statistique fédérale de la chasse contient des données sur la chasse, les effectifs ou le gibier péri des différentes espèces pouvant être chassées en Suisse. Cette base de données indique aussi le nombre de personnes autorisées à chasser ou les dégâts causés par le gibier. Les données, qui ont été saisies par les cantons, remontent parfois à 1933.

Does it cover the following? (tick where applicable and provide details)

☒ All AEWA species occurring in your country

> All AEWA species allowed for hunting are covered

☒ The whole territory of your country

> See Web link above

☒ All harvesting activities

> See Web link above

Field for additional information (optional)

> Hunting is being monitored nation-wide. Harvest data for all species allowed for hunting can be found in the federal hunting statistics, which are published each year.

The taking of waterbirds is strongly restricted due to the protection of the most important waterbird areas and through the limited hunting period. Numbers of birds shot by hunters where hunting is allowed are in general relatively low.

**22. Has your country phased out the use of lead shot for hunting in wetlands? (AEWA Action Plan, paragraph 4.1.4)**

☒ Fully

When was the lead shot use in wetlands banned? What legislation is in place? Who does enforce this legislation?

> Lead shot use in wetlands was banned in 1998 by the Ordinance on Hunting and Protection of Wild Mammals and Birds (Art. 2.1(h)). The ban is enforced by cantonal authorities.

**23. Are there measures in your country to reduce/eliminate illegal taking? (AEWA Action Plan, paragraph 4.1.6)**

☒ Yes

How would you rate the effectiveness of the measures?

☒ High

Please provide details

> Hunters undergo a formal education and examination.

In general illegal taking is not a major problem in Switzerland.

**24. Has your country used the AEWA Guidelines on sustainable harvest of migratory birds?**

☒ Yes

Please provide details

> Wiedmer E. (2002): Analysis of the AEWA Conservation Guidelines with reference to Swiss legislation on the protection of nature, species, habitats and designated sites; Swiss Agency for the Environment, Forests and Landscape (SAEFL)

#### 6.2. Other human activities

**25. Does your country have legislation in place, which provides for Strategic Environmental Assessment/Environmental Impact Assessment (SEA/EIA) of activities potentially negatively affecting natural habitats or wildlife? (AEWA Action Plan, paragraph 4.3.1)**

☒ Yes and being implemented

Do the SEA/EIA processes consider waterbirds and habitats on which they depend?

☒ Yes

Please provide details

> The Ordinance on the Environmental Impact Assessment (1988, SR 814.011) includes a list of 70 installations subject to environmental impact assessment.

The principal characteristics of the Environmental Impact Assessment (EIA) are the obligation for the applicant to collaborate actively by providing the necessary data, the participation of the specialised service of the protection of environment in the decision-making process, and a procedure open to the public.

The EIA contributes in a significant way to the implementation of the principle of precaution. The fact that environment protection organisations have the right to make an objection against the decisions relating to projects subjected to EIA reinforces the efficacy of EIA.

Do the SEA/EIA processes include public participation?

☒ Yes

Please provide details

> The procedure is open to the public. The Federal Act on Protection of Nature and Cultural Heritage (1966, RS 451, last revised in 2006) guarantees Non Government Organisations (NGOs) the right of appeal concerning the protection of nature.

**26. In the last three years, has your country used SEA/EIA for all relevant projects to assess the impact of proposed projects on migratory waterbird species listed on table 1 and/or habitats/sites on which they depend? (AEWA Action Plan, paragraph 4.3.1)**

☒ Yes, all proposed projects

**27. Is by-catch of waterbirds in fishing gear taking place in your country? (Resolution 3.8)**

☒ Not applicable

**28. Has your country undertaken steps towards the adoption/application of measures to reduce the incidental catch of seabirds and combat Illegal Unregulated and Unreported (IUU) fishing practices in the Agreement area? (Resolution 3.8)**

☒ Not applicable

# Pressures and Responses

## 7. Research and Monitoring

### 29. Does your country have waterbird monitoring schemes for the AEWA species in place? (Strategic Plan 2009-2017, Objective 3, Target 2)

☒ Yes

#### Covering the breeding period

☒ Fully

You have attached the following Web links/URLs to this answer.

[Monitoring common breeding birds](#) - Description of the common breeding bird survey

[Monitoring breeding birds in wetlands](#) - General description of the monitoring of breeding birds in wetlands

[Information service - Monitoring rare breeding and visiting birds](#) - Information service - Monitoring rare breeding and visiting birds

Please provide details

> The Swiss Ornithological Institute monitors the distribution and populations of wild birds in Switzerland.

Monitoring common breeding birds

Since 1999, the populations of about 150 breeding bird species are surveyed in 267 1-km squares laid out as a representative grid across all of Switzerland. Annual population trend estimates are produced for about 70 of the more common and widespread species.

Monitoring breeding birds in wetlands

The wetland breeding bird monitoring complements other monitoring projects such as the monitoring programme of common breeding birds and produces estimates of population trends for species not surveyed in a satisfactory manner in these general-purpose schemes. By doing so, wetland breeding bird monitoring makes an important step towards closing the gap of our objective to assess the conservation status and trends of all birds breeding Switzerland.

Information service - Monitoring rare breeding and visiting birds

The Information service receives about 400,000 chance observations every year from volunteer birdwatchers all over Switzerland. For many species this provides reliable information on their spatial and temporal patterns of occurrence as well as on population trends.

#### Covering the passage/migration period

☒ Fully

You have attached the following Web links/URLs to this answer.

[Monitoring des oiseaux nicheurs et migrateurs rares \(fr\)](#) - General description of the monitoring of rare breeding and migratory birds

Please provide details

> See above

#### Covering the non-breeding/wintering period

☒ Fully

You have attached the following Web links/URLs to this answer.

[Monitoring of wintering water birds \(fr\)](#) - General description of the monitoring of the wintering water birds. Results of the census can be downloaded.

Please provide details

> Since 1967 waterbirds are counted throughout Europe and in adjacent regions. This international waterbird census is coordinated by Wetlands International. The waterbird census is an important tool to estimate population size and trends of birds and to identify important wintering sites.

Volunteer collaborators of the Swiss Ornithological Institute count all waterbirds every year in mid-November and mid-January. All the major waterbodies and a number of smaller lakes and rivers in Switzerland are covered. In the waterbird reserves of international importance monthly counts are carried out in collaboration with regional organisations. Data are stored in a national database and forwarded to Wetlands International for incorporation in the database of the International Waterbird Census. Results are published in annual reports.

Field for additional information (optional)

> The Federal Office for the Environment (FOEN) is carrying out a programme called "Biodiversity Monitoring in Switzerland" (BDM).

The Swiss Ornithological Institute and the Société romande pour l'étude et la protection des oiseaux "Nos Oiseaux" have a co-ordinated national monitoring scheme. Together with ornithological societies and a few hundred voluntary ornithologists, it carries out the mid winter waterbird census in co-ordination with Wetlands International. The results are published in "Nos Oiseaux" and in "Der Ornithologische Beobachter".

**30. Have you used the AEWA Guidelines for a waterbird monitoring protocol?**

☒ Yes

Please provide details

> Wiedmer E. (2002): Analysis of the AEWA Conservation Guidelines with reference to Swiss legislation on the protection of nature, species, habitats and designated sites; Swiss Agency for the Environment, Forests and Landscape (SAEFL)

**31. List (or provide links to lists) of research related to waterbirds and their conservation that has been undertaken or results published in the past triennium (Strategic Plan 2009-2017, Objective 3, Target 5)**

> The Swiss Ornithological Institute is particularly dedicated to research and monitoring in the field of wetlands, waterbirds and bird migration.

In 2011 the NGO Stork Switzerland started a new project "SOS Stork" to study migration pathways of young white storks using telemetry.

You have attached the following Web links/URLs to this answer.

[Publications of the Swiss Ornithological Institute.](#) - Publications of the Swiss Ornithological Institute.

**32. Has your government provided over the past triennium funds and/or logistical support for the International Waterbird Census at international or national level? (Strategic Plan 2009-2017, Objective 3, Target 1)**

☒ Yes

**Nationally**

☒ Yes

Please provide details

> The Swiss Ornithological Institute and the Société romande pour l'étude et la protection des oiseaux "Nos Oiseaux" carries out the mid winter waterbird census in co-ordination with Wetlands International.

**Internationally**

☒ No

# Pressures and Responses

## 8. Education and Information

### 8.1. AEWA Communication Strategy

**33. Has your country developed and implemented programmes for raising awareness and understanding on waterbird conservation and about AEWA? (Strategic Plan 2009-2017, Objective 3, Target 3 and AEWA Action Plan, paragraphs 6.1-6.4)**

☒ Other

Please explain

> There are no training or development programmes specific to the AEWA Action Plan. Training and awareness programmes in general nature conservation is taken care of by NGOs. NGOs regularly campaign for the conservation of wetlands and the protection of waterbirds.

**34. Has your country provided funding and other support, as appropriate (e.g. expertise, network, skills and resources), secured for the implementation of the AEWA Communication Strategy? (Strategic Plan 2009-2017, Objective 3, Target 1 and Resolution 3.10)**

☒ No

**35. In Resolution 3.10 the Meeting of the Parties encouraged Contracting Parties to host AEWA Exchange Centres for their respective regions. Has your country considered/shown interest in hosting a Regional AEWA Exchange Centre? (Strategic Plan 2009-2017, Objective 3, Target 2 and Resolution 3.10)**

☒ Not considered yet

**36. Training for CEPA (Communication, Education and Public Awareness) at national level is supposed to be conducted by staff, which has been trained in the framework of the AEWA Training of Trainers programme. Has such training taken place in your country in the past triennium? (Strategic Plan 2009-2017, Objective 3, Target 2)**

Applicable only for countries in regions where Training of Trainers programme has taken place

☒ No

# Pressures and Responses

## 9. Implementation

### **37. Has your country approached non-contracting parties to encourage them to ratify the Agreement? (Resolution 3.10)**

Report only on activities over the past triennium

☒ Yes

Please list all non-contracting parties, which were approached, and describe each case, including achieved progress

> Switzerland supported the organisation of promotional workshops for the Russian Federation, Burkina Faso and Cameroon.

### **38. Has your country supported/developed international co-operation projects for the implementation of the Agreement, according to the priorities outlined in the AEWA International Implementation Tasks (IIT) for the current triennium? (Resolution 3.11)**

☒ Yes

Please list grants provided to IIT projects, or list all undertaken initiatives and briefly provide any relevant information

> 2010:

5th edition of the AEWA Conservation Status Report

2011:

4-month project to develop Guidelines, a reporting structure and evaluation criteria for the re-establishment of AEWA waterbird species, which includes following activities:

- Development of Guidelines for re-establishment specific to waterbird species adapted from the broader IUCN Guidelines for Re-introductions (1995)

- Development of a reporting structure and standard set of evaluation criteria

- Translation of final Guidelines into French

- Printing of final Guidelines in English and French

1-year project to develop an International Single Species Action Plan for the Shoebill (*Balaeniceps rex*), containing the following activities:

- 3-day stakeholder consultation workshop in Tanzania bringing to national and international experts from the key range states,

- Drafting of the International Single Species Action Plan for the Shoebill.

1-year AEWA Small Grants Fund project in Gambia on "strengthening monitoring of breeding colonies of waterbirds on Bijol Islands"

### **39. Has your country resourced the AEWA Small Grants Fund over the past triennium? (Strategic Plan 2009-2017, Objective 5, Target 5)**

☒ Yes

### **40. Does your country have in place a national coordination mechanism for implementation of AEWA, possibly linking to national coordination mechanisms for other biodiversity Multilateral Environmental Agreements (MEAs)? (Strategic Plan 2009-2017, Objective 5, Target 8)**

☒ Yes, it is operational on a regular basis

Please provide details

> Consultations among focal points on a regular basis.

## Pressures and Responses

### 10. Avian Influenza

**42. What issues have proved challenging in responding nationally to the spread of the Highly Pathogenic Avian Influenza (HPAI) in the last triennium and what further guidance or information would be useful in this respect?**

List challenges

› No cases of Highly Pathogenic Avian Influenza in the last triennium.

List required further guidance or information

› No further guidance or information required.

Field for additional information (optional)

› "Constanze" was a trinational project on avian influenza in wild birds at lake Constance from 2007 to 2009. In collaboration with government agencies scientists examined the prevalence of AI virus in the region of Lake Constance for a period of 33 months, compared the effectiveness of different surveillance methods and analysed the migration behaviour of water birds. Although virus introduction from regions as far as the Ural Mountains seemed possible based on the migration behaviour of certain species, no influenza viruses of the highly pathogenic subtype H5N1 was found.

**43. Have you visited and used as a reference the AIWEb (the Avian Influenza, Wildlife and the Environment web site)?**

☒ No

## **11. Confirmation**

### **Confirmation of information verification and approval for submission**

#### **Please confirm:**

In addition a scanned copy of an official letter from the relevant state institution, approving the report for submission, can be attached.

☒ I declare that the information provided in the Report on the implementation of AEWA for the period 2009-2011 has been verified and the report has been approved for submission by the appropriate state institution in the country.

#### **Date of submission**

> Interim submission: We have so far not received the feedback from all reviewers. The report has therefore not been approved by the Federal Office for the Environment; however, the interim submission was approved by the Swiss AEWA Focal Point to allow the Secretariat to proceed in its work.
